Introduction

This is the final, Referendum version of the Stoke Lacy Neighbourhood Development Plan.

The Draft Plan was published for formal, Regulation 14 public consultation for 6 weeks from 17th January 2022 until 7th March 2022.

The Submission version of the Plan was prepared following careful consideration of the responses to the formal consultation, further work by the Steering Group on matters such as views, Local Green Spaces and settlement boundaries and consideration of the Stoke Lacy Design Guidance and Codes, commissioned through the Locality Technical Support Programme. It was published for consultation by Herefordshire Council from 18th May 2022 until 29th June 2022.

The NDP was examined by an independent examiner in October 2022. The examiner recommended a number of modifications to the Plan to ensure it is clear and concise and provides a practical framework for decision making. These included changes to wording in some policies and supporting text and replacing detailed design policies with one single policy referring to the design codes. Subject to the recommended modifications the examiner concluded that the Plan meets the basic conditions and can go forward to a referendum. The referendum version incorporates the examiner's recommended modifications.

The complete Stoke Lacy Design Guidance and Codes document (Appendix 7 of the NDP) is published as a background document on the NDP website. This document was developed with direction from AECOM over several months. It is an important background, evidence-based document.

The policies were written to reflect feedback wherever possible but are mindful that the NDP also needs to conform generally with Herefordshire Council's Core Strategy Local Plan 2011 - 2031 and have regard to national planning policies.

1.0 Background

Aerial view of Stoke Lacy and Stoke Cross

What are NDPs?

- 1.1 NDP's were introduced through the Localism Act 2011 to give local people a greater say in planning decisions that affect their area. NDPs are neighbourhood level planning policy documents designed to reflect the needs and priorities of local communities. Eventually the NDP will be used to help determine planning applications in Stoke Lacy Parish.
- 1.2 NDPs can identify where development should take place, set out local design principles so that buildings respond positively to local character, and protect important facilities, historic buildings, the natural environment, and open spaces. They are an important part of our planning system because planning applications will be determined in accordance with the development plan¹ unless material considerations indicate otherwise. Made (adopted) NDPs are part of the local statutory development plan for their area.
- 1.3 A diagram setting out the key steps for preparing NDPs is provided in Appendix 1.

¹ **Development Plan:** Is defined in section 38 of the Planning and Compulsory Purchase Act 2004, and includes adopted local plans, neighbourhood plans that have been made and published spatial development strategies, together with any regional strategy policies that remain in force. Neighbourhood plans that have been approved at referendum are also part of the development plan, unless the local planning authority decides that the neighbourhood plan should not be made (NPPF Glossary).

- 1.4 The NDP cannot be prepared in isolation. It has to have regard to national planning policies, which are set out in the National Planning Policy Framework (NPPF) (revised on 20th July 2021)² and explained in Planning Practice Guidance³, and it has to be in general conformity with the adopted Herefordshire Local Plan Core Strategy 2011 - 2031⁴. Policies should not duplicate or conflict with those set out in national or local planning policies. The NDP has to be supported by a robust technical evidence base and the process involves several phases of informal and formal public consultation, an examination and eventually a local referendum. Local people will be able to vote whether their NDP should be used by Herefordshire Council to help determine planning applications in their parish and if there is a majority 'Yes' vote (50% of turnout + 1) Herefordshire Council will adopt the NDP.

NDP Process

- 1.5 A show of hands at the public meeting in February 2020 (with 60 attendees), demonstrated that the majority of those that attended were in favour of developing a Neighbourhood Development Plan (hereafter referred to as NDP).
- 1.6 On 20th November 2019 the Parish Council applied to Herefordshire Council for designation as a neighbourhood area (as shown on Map 1) and this was approved on 8th January 2020.
- 1.7 The Parish Council held two public meetings to begin work on the NDP. The first was held on 6th October 2019 to establish whether there was interest in developing a Neighbourhood Plan. At that meeting a representative from Herefordshire Council introduced the subject and provided information about NDPs. After a discussion, a vote was held, and it was agreed that a Steering Group should be formed to move forward with a Neighbourhood Plan for the Parish. A further parish meeting was held on 5th February 2020 and stakeholders were invited to sign up to receive emails about progress on the NDP. More than 60 people attended, and the meeting was a first chance to think about the priorities for the vision of Stoke Lacy's future. A transcript of the Q&A session can be viewed on the website in the document 'Community Comments'.

- 1.8 The NDP Steering Group was formed on 30th October 2019 and held working meetings in public, at least once a month. Details and notes of the meetings are provided on the NDP pages of the Parish Council website. Meetings were held at the Plough Inn or the Village Hall. During the Covid-19 pandemic most meetings were held online but members of the public were invited to join by prior arrangement with the Parish Clerk.

³ <https://www.gov.uk/government/collections/planning-practice-guidance>

⁴ <https://www.herefordshire.gov.uk/local-plan-1/local-plan-core-strategy/2>

Issues and Options

- 1.9 In the Autumn of 2020 residents were asked to participate in an Issues & Options consultation. An Issues and Options document was prepared by the Steering Group in Summer / Autumn 2020. This set out a draft vision and objectives for the NDP and explained the various planning issues the Steering Group had identified, which could be addressed in the NDP through planning policies, and proposals such as site allocations. The questions addressed objectives, future housing development and settlement boundaries. The responses revealed that 93.85% agreed with the objectives.
- 1.10 The complete document was published on the NDP website <https://www.stokelacy.co.uk/> and a summary version and questionnaire were delivered to all households. The consultation took place from 18th October 2020 until 21st November 2020 (although late responses were accepted).
- 1.11 Residents and stakeholders were invited to respond by email or in writing and could leave completed questionnaires and written comments at dedicated NDP post boxes at the Village Hall or the Church. They could also comment on the NDP website forum: comments@stokelacy.co.uk.
- 1.12 Unfortunately planned public events at the Village Hall could not take place due to Covid-19 restrictions but publicity included an email address and telephone number for anyone wishing to talk to a member of the NDP Steering Group by phone or face to face in a socially distanced meeting.
- 1.13 The full report on the responses to the consultation ('Stoke Lacy Neighbourhood Development Plan 2020-2031 Issues and Options, Autumn 2020 – Survey Results') is published on the NDP website. There was a good response rate with 65 completed response forms returned from 201 households, this includes households that responded as a couple, representing a response rate of 40%. The responses to the questionnaire and comments from the community at the Public Meeting (on 5th February 2020) were considered carefully and used to inform the policies in the emerging first Draft Plan. (Percentages of responses have been rounded in the NDP.) There were also a large number of comments about other parish issues which have been considered by the Parish Council and where appropriate are included as proposed actions. A record of the comments can be seen in the document 'Community Comments' on the website.

Call for Sites and Technical Assessment

- 1.14 A key issue for the Draft NDP consultation was the consideration of potential sites for future housing. NDPs provide a stronger, more robust planning framework for determining future planning applications for housing if they include at least one site allocation for new housing.
- 1.15 The Parish has exceeded its current target growth figure by 21 units. To explore possibilities in case of future need for development before 2031 a Call for Sites was undertaken by the Parish Council in August 2020. Landowners and their agents were invited to submit potential sites for consideration. Herefordshire Council also undertook a Call for Sites in summer 2020 but this did not produce any additional sites to those submitted to the Parish Council. 12 sites were put forward (see Map 2) and subjected to a technical site assessment undertaken by independent consultants AECOM (see 'Stoke Lacy Neighbourhood Plan Site Options and Assessment Report, January 2021' published on the NDP website).

Map 2: All Submitted Sites

@Crown copyright [2022] Ordnance Survey 100055940 on behalf of Stoke Lacy Parish Council 100061610

- 1.16 The Steering Group invited Herefordshire Council Highways Department to comment on the options for site allocation and these are included at the end of the NDP Site Options and Assessment Report on the website.

Consultation on Emerging Draft Plan and Options for Site Allocations

- 1.17 In Spring 2021, a first draft of the Plan was published for informal public consultation. The emerging Draft Plan and options for site allocations were published for informal consultation over 4 weeks from 5th April until 7th May 2021. Covid-19 restrictions continued during this period and so face to face meetings could not take place. A summary document was delivered to all households in the Parish and the full version was available on the NDP web pages with hard copies available on request. There were 65 responses which represents 40% of local households. Overall, there was support for the Vision, Objectives and emerging Draft Policies and a large number of detailed comments were provided, which have been used to inform amendments to the Draft Plan. The full report of the consultation results ('Responses to the Issues and Options Document') is published on the NDP website (<https://www.stokelacy.co.uk/>).
- 1.18 The questionnaire invited residents to tell us whether they supported or objected to, each of the 3 possible sites considered technically suitable, or suitable subject to constraints being overcome. Responses were invited by leaving completed forms in the NDP mailboxes located at the Village Hall or in the Church porch, or by email to: parishclerk@stokelacyparishcouncil.org, or by submitting responses directly to the NDP website. 65 responses were submitted.
- 1.19 The full report of the consultation 'NDP Responses to Call for Sites Options' is published on the NDP website <https://www.stokelacy.co.uk>. The responses showed that a higher proportion objected to all the possible housing sites than supported them, although a significant number were neutral or did not answer. Comments from a number of residents showed continued support for development on smaller sites and therefore the Steering Group liaised with the landowners to explore options for reducing the proposed size and

scale of development. Following discussions with Herefordshire Council the Steering Group recommended the inclusion of one small site allocation for 2 houses within the settlement boundary of Stoke Cross.

Regulation 14 Public Consultation

- 1.20 The Draft NDP was published for 6 weeks Regulation 14 Public Consultation from Monday 17th January 2022 to 5pm Monday 7th March 2022. Public meetings were held in the Village Hall on Wednesday 19th January 2022 between 19:00 and 21:00 and Saturday 22nd January 2022 between 14:00 and 16:00.
- 1.21 The Draft Plan and supporting documents were published on the NDP website. A flyer was delivered to all households in the Parish. Consultees were invited to respond using the NDP mailboxes located at the Village Hall or in the Church porch, or by post to: Stoke Lacy Parish Clerk, 4, Millfield, Canon Frome, Ledbury HR8 2TH; or by email to parishclerk@stokelacyparishcouncil.org, or by completing an online form on the NDP website: www.stokelacy.co.uk By: 5pm Monday 7th March 2022.
- 1.22 A Consultation Statement giving more detailed information about the various public consultation and engagement processes and how responses have informed and shaped the Plan is provided on the website as one of the submission documents. Following the Regulation 14 consultation a number of amendments were made to the Plan including reformatting of the policies, changes to policy wording and the addition of several new policies to protect identified community facilities and an employment site, and to guide planning decisions on polytunnels and renewable energy schemes in the neighbourhood area.
- 1.23 In addition a Basic Conditions Statement was prepared setting out how the Stoke Lacy NDP met the required basic conditions to be tested at examination.
- 1.24 The NDP Steering Group endeavoured to capture as many of the comments and concerns of residents as possible in the Submission Plan, to help ensure the document continues to reflect local peoples' aspirations and ideas and remains relevant to our community.
- 1.25 It is important to note that the Herefordshire Core Strategy refers to the Landscape Character Assessment (LCA) 2009. This provides guidance necessary to comply with landscape policies of the Local Plan and is intended to promote the use of landscape assessment to increase awareness of the countryside's character and ensure future development is compatible with that character. Stoke Lacy falls within Timbered Plateau Farmlands Landscape type. The LCA notes this type is one of the best preserved in the County and in order to retain its character, it is recommended that densities remain low, and development takes the form of modest additions to existing settlements or individual dwellings. This reflects many opinions expressed in the consultations and therefore it is essential that it drives the content of our plan and that any development proposals conserve and enhance the environmental assets that contribute towards the distinctiveness of this area.

Submission

- 1.26 The revised NDP was submitted to Herefordshire Council in May 2022. Regulation 16 consultation was carried out between 18th May and 29th June 2022.

Examination

- 1.27 The NDP was examined by an independent examiner in October 2022. The examiner's report (Stoke Lacy Parish Neighbourhood Plan 2021 – 2031 Independent Examiner's Report, October 2022) is published on the NDP website.
- 1.28 The examiner advised in the report that 'I am satisfied that the Stoke Lacy Neighbourhood Development Plan, subject to the modifications I have recommended, meets the basic conditions and the other statutory requirements outlined earlier in this report. I am therefore pleased to recommend to Herefordshire Council that, subject to the modifications proposed in this report, the Stoke Lacy Neighbourhood Development Plan can proceed to a referendum.'

2.0 A Portrait of Stoke Lacy Parish

- 2.1 Stoke Lacy Parish is in the north-east of Herefordshire, about 4 miles south-west of Bromyard, 10 miles north-east of Hereford and 18 miles west of Worcester. The Parish is rural in character, with an agricultural landscape of orchards, hedged fields, scattered farms and cottages, woods and wooded valleys. The River Lodon meanders through pastures in the south-west corner.
- 2.2 Development is concentrated in the settlements of Stoke Cross and Stoke Lacy. The A465 runs through the Parish approximately north-east / south-west with scattered dwellings along its route. From the main road a network of single-track lanes leads to farms and individual houses in the wider rural area.
- 2.3 The neighbourhood development plan area covers 1,094 hectares. The population of the Parish was recorded as 364 in the 2011 Census. It fell to 339 in mid-2018, and of these 95 were aged over 65 years, echoing the ageing population trend in much of rural Herefordshire.
- 2.4 In recent years the community has come together to support three major local projects, the building of a Village Hall, the planting of Netherwood to celebrate the Millennium and the repair of the church spire with its ongoing 'Harvesting our Heritage' project - see <https://www.stokelacyheritage.co.uk>.

Stained glass window showing Morgan car

- 2.5 There are two memorial stained-glass windows in the church porch featuring Morgan cars. The Morgan Car company has always supported village activities, and members of the family are buried in the churchyard. HFS Morgan was raised in The Rectory opposite the church where his father HG Morgan was Prebendary Rector. In 1909 HFS Morgan built his first car in Malvern and with his father founded the Morgan Motor Company.

- 2.6 There is a daily bus service connecting Stoke Lacy to Hereford and Worcester via Bromyard. As this service has declined in frequency it has become less convenient and so is less well used. Traffic on the A465 has greatly increased in recent years with changes in lifestyle, more commercial vehicles, a reduction in rural bus services and an increase in local as well as through traffic. The A465 is the main road link between Bromyard and Hereford. This is a national as well as an individual issue and parishes should play their part by considering ways to reverse this trend. The National Byway section between Chester and Cirencester passes through the western edge of the parish.
- 2.7 The community is mixed, made up of families who have lived in the area for generations as well as people who have settled more recently. Employment and working patterns include commuting, working locally or from home. With an ageing population there is an increasing number of retired people living in the Parish. Despite this diversity there is a strong sense of community; in times of trouble such as recent flooding or the Covid-19 pandemic, people have come together for mutual support. With no school or shop, the three main places where people can gather are the Village Hall, the church and the pub - these are the places where activities and events take place, and they are appreciated and well supported by local people.

3.0 Vision and Objectives

- 3.1 The Vision and Objectives for the NDP have been prepared by the Steering Group, taking into account comments made during the consultations. The Vision sets out how the Parish should look in the future and the Objectives provide the framework for preparing the NDP planning policies and proposals to achieve the Vision.
- 3.2 The responses to the Issues and Options consultation showed that nearly 94% of respondents (61) supported the Draft Vision and Objectives. The Steering Group reviewed them again in the light of the comments and this resulted in several minor changes.

Vision for Stoke Lacy NDP

Stoke Lacy is a rural community which wishes to retain its distinctive character of historic and heritage assets while allowing the community to flourish and develop. Development should be sustainable thereby meeting the needs of the present without compromising the ability of future generations to meet their own needs. Emphasis should be on Climate Smart Choices and resource efficiency. By 2031, residents of Stoke Lacy will continue to enjoy a high quality of life with good access to local facilities and to the exceptional countryside around the Parish.

Objectives for Stoke Lacy NDP

Objective 1: To protect and enhance valued landscapes and views and the intrinsic character and beauty of our countryside; to recognise the wider benefits including those of the best and most versatile agricultural land and of the trees and woodlands; to protect our dark skies, wildlife habitats and biodiversity; to protect the countryside from inappropriate development.

(See NDP Policies SL1: Protecting and Enhancing Local Landscape Character and Biodiversity, SL2: River Wye Special Area of Conservation (SAC) and SL4: Local Green Space.)

Objective 2: To develop a greater sense of community and identity and improve the cohesion between the several separate communities that make up Stoke Lacy Parish ensuring new residents feel welcome, and everyone feels safe and valued.

(See NDP Policies SL3: Community Facilities, SL4: Local Green Space and SL5: Public Open Space.)

Objective 3: To support and enhance existing local facilities including the Village Hall, Church and Plough Inn Public House, and to actively encourage community involvement and engagement in Parish activities.

(Through NDP Policy SL3: Community Facilities, the preparation of the NDP and other Parish Council activities.)

Objective 4: To ensure all new buildings make a positive contribution to local character and distinction whilst embracing innovative and contemporary design, with resource efficiency very much in the foreground. Design codes should be used to ensure land is used efficiently while also creating beautiful and sustainable places which maintain the area's prevailing character and setting including rural gardens.

(See NDP Policy SL6: Achieving and Promoting Good and Sustainable Design in Development)

Objective 5: To provide a supportive framework for all appropriate local, rural economic development.

(See NDP Policies SL7: Employment Site, SL8: Agricultural Buildings and Polytunnels Requiring Planning Permission, SL9: Proposals for New Renewable Energy Technology Schemes, and SL10: Tourism and Rural Enterprise.)

Objective 6: To improve accessibility for all so that roads and rights of way, and particularly the A465 will be attractive and safer for all users, well maintained and have good signage. They should also encourage active travel use.

(See NDP Policy SL11: Improving Accessibility and Sustainable Travel.)

Objective 7: To sustain age diversity in the community by ensuring the availability of suitable property for the younger generation and for an ageing population. This will enable them to remain in the community that they know and by which they are supported as their housing needs change. New housing should be located where it will enhance or maintain the vitality of our community.

(See NDP Policy SL12: Development within the Settlement Boundaries, Site Allocation SL12/1: Crossfield House, Stoke Cross and Policy SL13: Housing Mix.)

Planning Policies

Bredenbury Road towards Stoke Cross

An NDP has the same legal status as the Local Plan once it has been agreed at a referendum and is made (brought into legal force) by the local planning authority. At this point it becomes part of the statutory development plan for the Neighbourhood Area. Applications for planning permission are determined in accordance with the development plan unless material considerations indicate otherwise.

The following chapters set out the planning policies and site allocations.

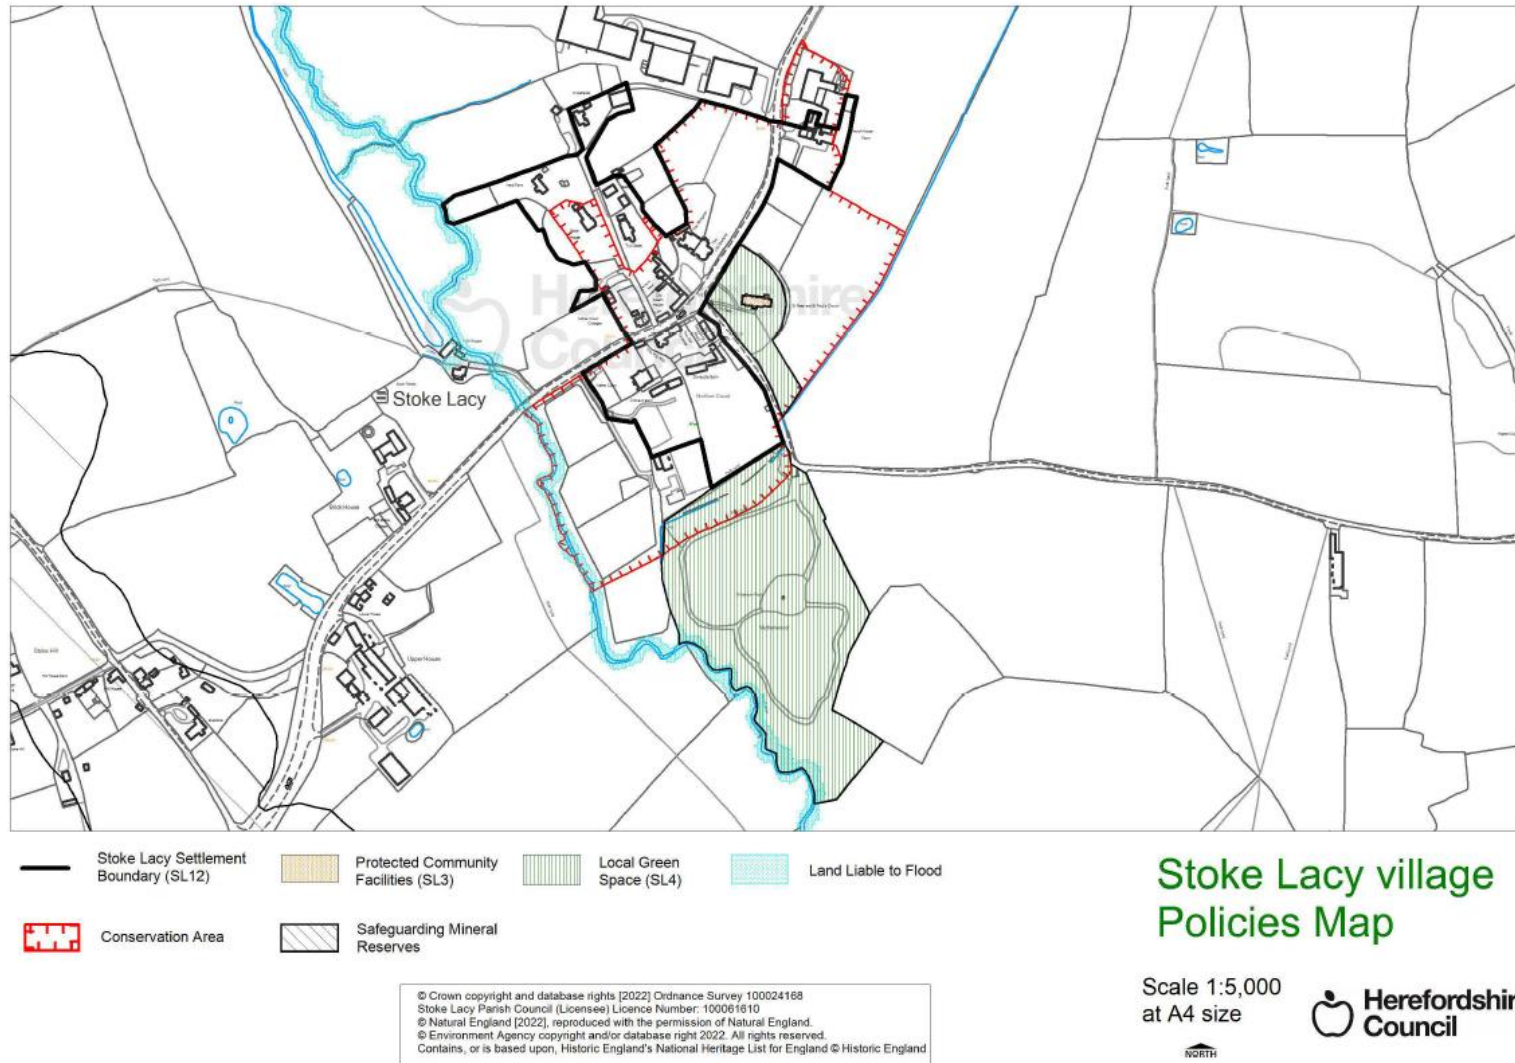

The Policies Maps (Maps 3A and 3B) for Stoke Lacy and Stoke Cross show the location of the Local Green Spaces, settlement boundaries, site allocations and commitments⁵ and these are provided at the beginning of the Planning Policies section.

The evidence and rationale behind each Policy are set out in the supporting text.

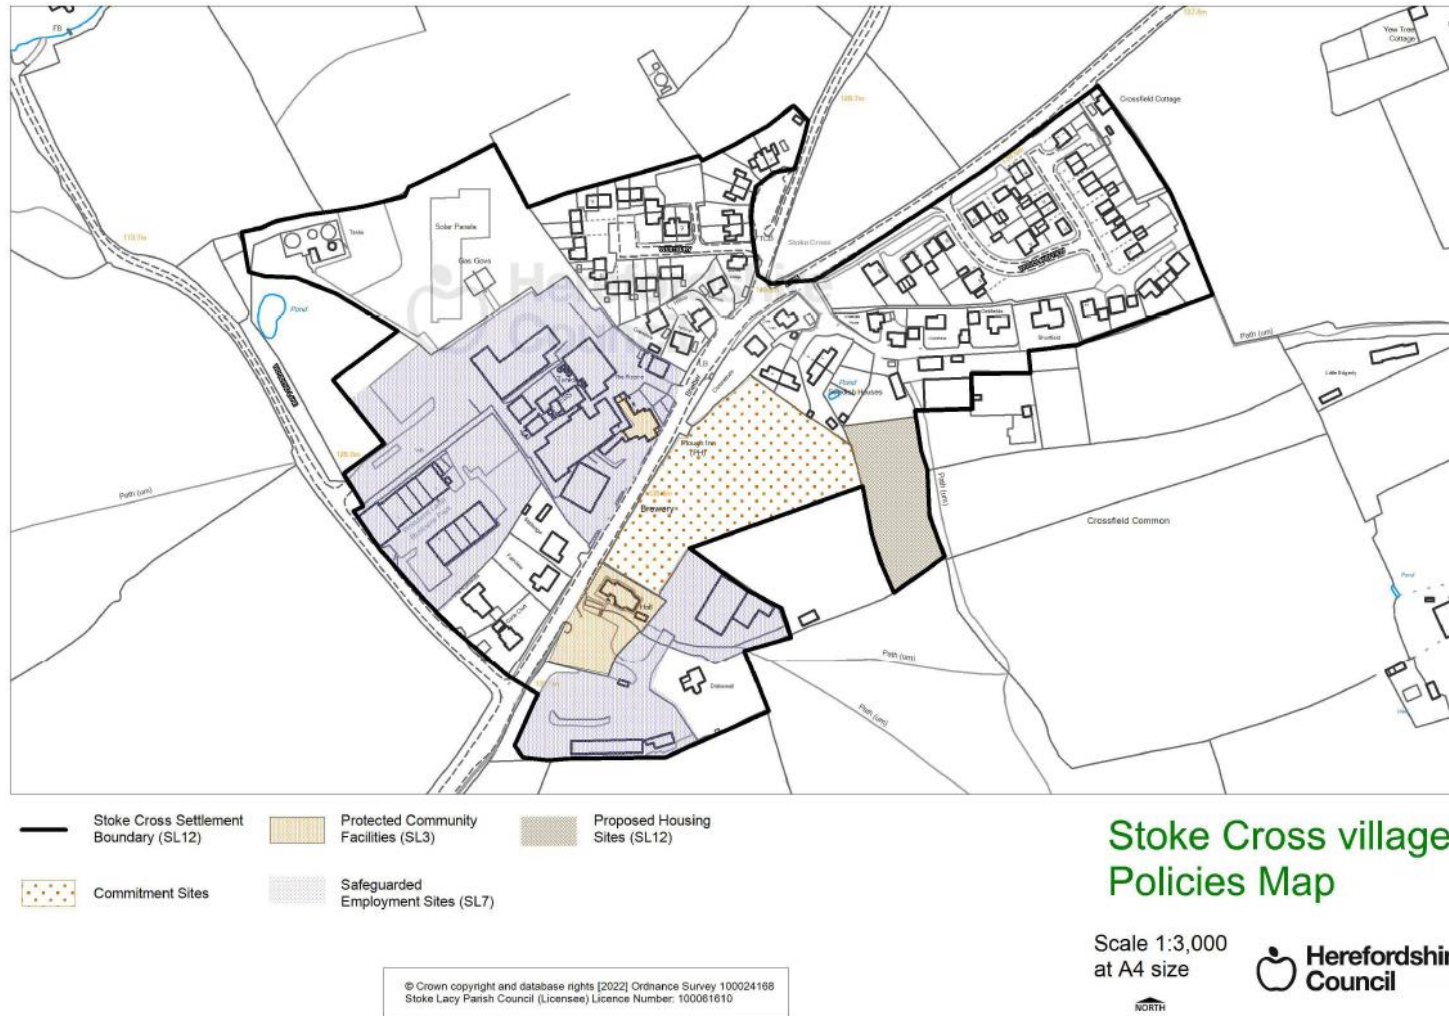

The policies are necessarily wide ranging in their scope and taken together, should help to deliver the future development within the Parish which is both sustainable and appropriate.

⁵ A commitment is a proposal which has planning consent or which is currently being developed.

Herefordshire Council

4.0 Natural Environment

Pond at Netherwood, Stoke Lacy

Landscape Character and Wildlife

- 4.1 Stoke Lacy Parish lies on the border of National Character Area 100 Herefordshire Lowlands and 101 Herefordshire Plateau⁶. Detailed descriptions of Sub-Regional Landscape Areas and Local Landscape Types are given in the 'Herefordshire Landscape Character Assessment Supplementary Planning Document', 2004 (updated 2009)⁷ and the landscape character type for Stoke Lacy is Timbered Plateau Farmlands, described as 'varied, agricultural landscapes of hedged fields, scattered farms, woods and wooded valleys associated with undulating relief. The dominant landform is one of the most prominent characteristics and tends to override the patterns of tree cover and field shape. Variations in topography within this landscape create a changing sequence of visual perspectives, ranging from open vistas on plateau summits to more secluded scenes along valley bottoms.'
- 4.2 The Parish has a very rural character and there are few places where a house is not within sight. The hilly nature of the landscape means it is best suited for mixed farming, cattle, sheep and arable farming and scattered throughout are paddocks with horses for private use. The majority of fields are enclosed by ancient hedges: some of these have been removed to enlarge the fields, leaving individual trees marking the line where the hedge used to run. The rolling terrain provides small pockets of wild spaces and wooded corners where wildlife flourishes and there are many areas of oak woodland, some of which have been established for a hundred years or more. There are two areas of ancient woodland at Hopton Dingle and Huddle Wood and other areas of woodland include Netherwood. The soil structure is predominantly of strong clay with a limestone subsoil.
- 4.3 Several streams and waterways flow within the area and the stream from Hopton Dingle flows through the village to the River Lodon.

⁶ <https://www.gov.uk/government/publications/national-character-area-profiles-data-for-local-decision-making/national-character-area-profiles>

⁷ https://www.herefordshire.gov.uk/download/downloads/id/2069/landscape_character_assessment_for_herefordshire.pdf

- 4.4 The roads are bordered by mixed hedges rich in wildflowers and plants of interest throughout the year, framing the ever-changing views around each corner.
- 4.5 Hops are being reintroduced into the area to supply the Wye Valley Brewery at Stoke Cross. Old cider orchards are gradually being rooted out to make way for development. New cider apple orchards have been planted which are better suited for mechanical picking. There are a few old, traditional orchards in the area and the apples from these are sold to Oliver's, a small cider-maker based down the road in Ocle Pychard. Damson trees were originally planted around orchards to attract bees for fertilising the apple crop. In the early part of the year their delicate froth of white blossom can still be enjoyed. In the autumn the fruit is picked to make jam, preserves and wine.
- 4.6 The settlement pattern of Timbered Plateau Farmlands (Herefordshire Landscape Character Assessment) is described as 'a dispersed settlement pattern of individual farms and hamlets. There are also occasional wayside dwellings and villages, which contribute to a rather varied settlement character, but always of a dispersed nature.'

Local Field – Stoke Lacy

- 4.7 Management guidelines suggest conservation and enhancement of existing hedgerows and woodland is important, including replacing the lost hedgerow oaks and using broadleaved native species. The linear pattern of woodland, following steeply incised stream dingles is a particular feature that should be protected.
- 4.8 The openness of the terrain surrounding Stoke Lacy is a haven for wildlife and the many ponds in gardens and farms support a myriad of species including frogs, toads, newts and especially Great Crested Newts, a protected species. Most of these species will migrate from pond to pond and hibernate during the winter months away from these ponds. Therefore, consideration must be given to these habitats when considering development needs.
- 4.9 The woods, forests and open farmland provide a wide variety of habitats for much of our wildlife. Birds such as raptors require these open spaces for hunting and nesting. Owls such as the Tawny, which sometimes nest on the ground, require the protection of dense woods to hide their nests. The Red Kite once extinct in Britain is now making a comeback in our area. Streams that flow through the village to the River Lodon supports Kingfishers who require clear flowing water to survive.

Planning Policy

- 4.10 The NPPF advises in paragraph 174 that 'Planning policies and decisions should contribute to and enhance the natural and local environment by:

- a) protecting and enhancing valued landscapes ...
- b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland.'

- 4.11 Core Strategy Policy LD1 – Landscape and townscape sets out that 'Development proposals should:
- demonstrate that character of the landscape and townscape has positively influenced the design, scale, nature and site selection, protection and enhancement of the setting of settlements and designated areas;
 - conserve and enhance the natural, historic and scenic beauty of important landscapes and features ... incorporate new landscape schemes and their management to ensure development integrates appropriately into its surroundings; and
 - maintain and extend tree cover where important to amenity, through the retention of important trees, appropriate replacement of trees lost through development and new planting to support green infrastructure.'

Consultation Responses

- 4.12 The responses to the Issues and Options consultation demonstrated strong local support for the NDP to include a policy to protect and enhance local landscape character. 98% of respondents (64) supported such a policy. Respondents listed a range of local landscape features which were considered important in the Parish including 'watercourses, fields, trees, hedgerows and woodlands, views, footpaths, farming and historic buildings'.
- 4.13 The area's dark skies were also noted as significant. Herefordshire is one of the best areas of the country for dark skies and Stoke Lacy is known to be one of the best areas in Herefordshire. The following photographs were taken by a local resident⁸.

Comet, July 2020

**Andromeda Nebula, 2.5 million light years away,
taken with a telescope**

- 4.14 The Issues and Options consultation also invited residents to comment on whether the NDP should identify and protect key important public views. 98% of respondents (46) agreed that

⁸ Photos provided by kind permission of David Leverington.

the NDP should protect the views identified by the Steering Group and a number of other important views were also suggested.

- 4.15 In the consultation on the emerging Draft Plan, 85% of respondents supported the policy on local landscape character. Comments referred to the need to protect local character and to limit development to smaller scale schemes (see Housing section). There were also concerns about the need for permissions for any new footpath routes on private land.

Key Public Views

- 4.16 Views throughout the Parish are critically important to its character. Stoke Lacy is a hilly, rural, agricultural parish. It is blessed with extraordinary views across a colourful patchwork of hedged fields of pasture interspersed with crops and woods. Throughout the landscape homes, in clusters or individually, nestle amongst traditional Herefordshire farmhouses and their redolent ranges of outbuildings and hop kilns, blending into the tints and textures of the rural fabric. A curtain of AONBs and National Parks encircle the parish: to the south/east the Malvern Hills, to the north/west the Shropshire Hills and to the south/west the Brecon Beacons with smaller hills such as Marcle Ridge in the middle distance. Seen from every road, lane and footpath, they encapsulate the character of the parish. These vistas are precious to everyone who lives and works in them as well as those who have time to stand and stare.

‘Views are very subjective and individual for a variety of reasons and memories. What they all have in common is the rural setting and the unspoilt nature of the village.’ (A comment by one of many respondents to the Autumn 2020 survey).

- 4.17 Views change with the weather, the seasons and the rotation of crops. It is impossible to select individual views, it is the character of the whole landscape that is special and should be protected for future generations. The scale and location of new homes should be carefully considered to minimise any negative impact they would have on the character of the area and should respecting the way the parish has evolved over time.
- 4.18 The key public views are identified in Figure 1 and on Map 4: Key Public Views.

Figure 1: Key Public Views

1) From Roxpole looking South West across newly ploughed fields. Brecon Beacons visible in the far distance.

2) From Westbury Car Park looking North over mixed agricultural land with hedges and woodlands.

3) The view North West from Woodland View looking over the A465 with agricultural land stretching into the distance.

4) Looking down the road from Stoke Cross South to Stoke Lacy across fields besides the A465. The Village Church Spire is just visible in the distance.

5) The view from Little Cowarne Road South West across a landscape where farms and Cottages nestle amongst fields and woods.

6) The view from Much Cowarne Road across typical Herefordshire fields towards the Malvern Hills.

Inquisitive sheep in the foreground and undulating hills in the distance.

Map 4: Key Public Views

- 4.19 Policy SL1 has been prepared to encourage development to protect and enhance those key features which contribute to local landscape character and biodiversity and to protect the area's nationally significant dark skies and important Key Public Views. The Policy draws on Design Code 02 Green infrastructure, active travel and open space which provides advice on providing enhancements to buildings to support wildlife, and Design Code 03 Views and landmarks which considers landscape character, views and natural environment assets.

Policy SL1: Protecting and Enhancing Local Landscape Character and Biodiversity

All relevant development proposals should demonstrate that the area wide and character area specific design principles and Design Codes 02 and 03 have been taken into account.

The design of all new buildings should minimise any adverse visual impacts on the local landscape character of Stoke Lacy Parish, and incorporate the following landscape design and biodiversity principles where they are applicable to the site concerned:

1. All new development within the settlements of Stoke Lacy and Stoke Cross should protect important local landscape features which enhance the character of the built-up area and link it to the open countryside. These include the following: watercourses, ponds, veteran / ancient trees, traditional hedgerows, woodland and traditional orchards. These features should be incorporated into landscaping designs.
2. Landscaping schemes should incorporate the planting of native broadleaved woodland species where possible, and plant new traditional species hedgerows in boundary schemes.
3. Landscaping schemes should be used to enhance local wildlife, providing new and restored habitats and contributing to biodiversity net gain.
4. Buildings should incorporate features to enhance biodiversity including bat bricks, bird boxes and hedgehog gravel boards;
5. Lighting schemes should be designed to minimise light pollution and protect the area's dark skies. Security lighting should be operated by intruder switching, be appropriate to the setting, be unobtrusive and energy efficient and have consideration for neighbouring amenity. Business development must have lighting plans and large agricultural units or tourist enterprises in the countryside should avoid light pollution.
6. Existing public rights of way should be protected, and schemes should provide safe and accessible linkages to nearby walking routes, cycle routes and bridleways wherever possible.
7. Existing views of landscape and heritage significance should be respected and used as a placemaking opportunity. A number of Key Public Views of particular importance to the local community have been identified and are shown on Figure 1. Views to the Church in Character Area Stoke Lacy are also important. Where a development proposal would affect these

views, appropriate evidence should be submitted with any application to demonstrate how the view has been taken into account and respected.

- 4.20 Policy SL2 provides wording to help ensure development will not have an adverse effect on the conservation objectives of the River Wye Special Area of Conservation (SAC) and to species of European importance.

Policy SL2: River Wye Special Area of Conservation (SAC)

All proposals must demonstrate that they protect, conserve, and enhance the natural environment in accordance with the principles in Herefordshire Local Plan Core Strategy policies SD3, SD4, LD1, LD2 and LD3. This includes demonstrating to a high standard, so that the competent authority may be sure, that the proposal will not have an adverse effect on the conservation objectives of the River Wye Special Area of Conservation (SAC) and to species of European importance. Planning permission will only be granted if it is shown so that the planning authority can be certain that the proposal, with mitigation, will not increase nutrient inputs to the SAC.

5.0 Community Facilities

Village Hall

Village Hall and Church

- 5.1 The relatively low population and rural character of the Parish mean that community facilities are limited.
- 5.2 A new Village Hall is situated in Stoke Cross on the A465 opposite the Plough Inn and Wye Valley Brewery. It was completed in 2000 with funds raised locally and through grant bodies, in particular the National Lottery. The current building was constructed on a parcel of land donated by a local benefactor, the late Bill Symonds, founder of Symonds Cider, and the new hall replaced the former school and Village Hall which were previously sited on the land where the tarmac car park now stands.
- 5.3 The hall is built from red brick with a tiled roof and wooden windows. The facilities consist of one large multi-purpose room for the 80 people capacity. There is a semi-permanent stage and a proscenium arch with curtains and permanent stage lighting in position. The kitchen is well-equipped with cooking facilities and sufficient crockery, cutlery and serving dishes for the 80-person capacity. A public footpath crosses the ground between the car park and the Village Hall. The car park has 22 parking spaces.
- 5.4 Stoke Lacy Village Hall is a registered charity (1082078) and is administered by a board of trustees. The hall is used regularly by a number of interest groups. Monthly meetings take place there of the Parish Council, the Women's Institute, Friendship Club and Gardening Club. There are also private bookings for small business conferences and training days, children's parties, parties, funeral wakes and exhibitions of local artists' work. The hall is used as a polling station for elections.

Stoke Lacy Harvest Lunch – Village Hall

Village Hall sign

- 5.5 To supplement the hall's income the trustees hold a number of fundraising events in the hall during the year which are also a means of promoting community involvement. There are twice yearly village breakfasts held in the hall, plays and murder mystery evenings, quizzes, Bingo, skittles, and plant sales. In addition, the local parochial church council holds their Christmas Bazaar and their harvest lunch in the hall.

- 5.6 The Village Hall boasts a sign designed by noted local artist Colin Simmonds as well as a large ceramic field map of the village on the western side of the hall constructed by local ceramicist Mark de la Torre.

- 5.7 The parish church of St Peter & St Paul is located in Stoke Lacy. For 850 years, from 1279 at least and probably Saxon times too, the Church on Stoke Lacy has served the people of the Parish. Whether or not we attend Church services, most of us still live by Christian values and turn to the Church for major events in our lives such as weddings, christening or funerals, or to celebrate festivals or seek comfort and support at challenging times. Having an open churchyard, a haven for wildlife, where we can remember those, we have loved, is also very important to many people.

- 5.8 The church itself is administered by the parochial church council. Church services take place each Sunday. The major Christian festivals of Easter, Harvest Festival and Christmas as well as Remembrance Sunday are also celebrated. The church forms part of the Bromyard Benefice and shares a vicar with St Peter's in Bromyard. Congregations are usually small consisting of fewer than twenty people but the major Christian festivals of Easter, Harvest festival and Christmas as well as Remembrance Sunday see congregations of fifty or more worshippers.

- 5.9 In order to maintain the fabric of the building and to ensure enough funds to pay the Parish share to the diocese of Hereford, the PCC hold a number of fundraising events throughout the year including:

- an annual fete in the church and churchyard,
- concerts and lectures,

- flower and arts festivals
- community coffee mornings.

- 5.10 Groups of volunteers help to clean and maintain the building and churchyard with Stoke Lacy's 'Flower Fairies' creating outstanding floral displays for special occasions. At least twice a year a major churchyard 'tidy-up' takes place, and the churchyard is mown regularly.
- 5.11 The churchyard offers a quiet public place for contemplation and for relatives to tend the graves of their loved ones. During the Covid-19 lockdowns it has been used as an outdoor space where local people can meet friends in a socially distanced environment. To facilitate this plastic seating, tables and a gazebo have been provided. It has proved to be very popular and very clearly demonstrates the importance of open spaces for social interaction which is vital for our mental as well as physical health. There are a number of well-established trees in the churchyard, large conifers, and some ancient yew trees. The stone lychgate was erected in memory of the Reverend Henry Morgan and the cast iron kissing gate at the entrance to the graveyard originally came from the site of the school and the old Village Hall.
- 5.12 There are ongoing community projects to explore the oral history of the Parish, the history of the church and its rectors as well as the revival of the Stoke Lacy Flower Show which had been established by the Morgan rectors. There is a wildlife project to attract more species and to manage 'God's Acre'.

Plough Inn Public House

- 5.13 The Plough Inn at Stoke Cross is a popular family run pub with a bar, lounge, restaurant and function room for weddings and parties. During the Covid-19 pandemic it provided a much-appreciated take-away service.

Plough Inn

Education

- 5.14 There are no schools or nurseries in Stoke Lacy; the primary school closed in 1967, which means that all children have to be transported by car or bus some distance. Primary aged children travel to school in various locations such as Burley Gate (2 miles), St Peters in Bromyard (4 miles), Pencombe (3.5 miles), Brockhampton (5 miles), Bredenbury (6 miles) and some travel as far as Hereford (10 miles) and beyond. Similarly, secondary age children must travel to Queen Elizabeth in Bromyard or to a number of schools in Hereford, for

example Bishop's School, St Mary's, Lugwardine and Hereford Sixth Form College as well as other schools and colleges further afield.

Planning Policy

- 5.15 The NPPF paragraph 92 advises that 'Planning policies and decisions should aim to achieve healthy, inclusive and safe places which a) promote social interaction ... and c) enable and support healthy lifestyles, especially where this would address identified local health and well-being needs.' Core Strategy Policy OS1 - Requirement for open space, sports and recreation facilities sets out that 'The provision of appropriate open space, sports and recreation facilities will arise in the following proposals for planning applications: 1. all new residential dwellings ...' Policy SC1 Social and community facilities advises 'development proposals which protect, retain or enhance existing social and community infrastructure or ensure that new facilities are available as locally as possible will be supported.' The Policy goes on to say existing facilities will be retained unless certain circumstances apply.
- 5.16 During the Regulation 14 public consultation, Herefordshire Council noted there was no policy regarding the protection of social and community facilities including that of The Plough Inn, Village Hall and Church linking to Core Strategy Policy SC1. These community facilities are therefore identified and protected in Policy SL3: Community Facilities and on the Policies Maps.

Policy SL3: Community Facilities

The following community facilities in Stoke Cross and Stoke Lacy are identified on Map 3A: Stoke Lacy Village Policies Map and Map 3B: Stoke Cross Village Policies Map:

- SL3/1 The Plough Inn;
- SL3/2 Village Hall; and
- SL3/3 Church of St Peter & St Paul

Proposals involving the loss of the community facilities identified on the Policies Maps or any community facility or local service will be strongly resisted. In exceptional circumstances, however proposals for a change of use of a community facility or local service will be considered where it has been clearly demonstrated, following at least 12 months open marketing at a price reflective of market value, that the use is no longer viable, or it will be replaced by an equivalent or enhanced community use in an equally accessible location.

Netherwood

Netherwood – Stoke Lacy

- 5.17 A few hundred yards to the south of the church is a nine-acre area of woodland with full public access. The site, known as Netherwood, was acquired in 1999 and is managed by the Woodland Trust as one of the ‘Woods on your doorstep’ created to commemorate the millennium. Within the woodland is an open space for picnicking, play and recreation as well as pathways for woodland walkers.

Woodland maintenance at Netherwood using traditional methods

Netherwood Sign – Stoke Lacy

Local Green Space

- 5.18 It is a characteristic of the Parish of Stoke Lacy that dwellings are interspersed with agricultural land, woods and green spaces.
- 5.19 The NPPF includes a relatively new provision - the designation of Local Green Space to protect locally significant areas from development. This is set out in paragraphs 101 to 103. Paragraph 102 sets out the criteria for such designations: 'The Local Green Space designation should only be used where the green space is:
- a) in reasonably close proximity to the community it serves;
 - b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and
 - c) local in character and is not an extensive tract of land.'

Consultation Responses

- 5.20 The Issues and Options consultation provided an opportunity to ask residents whether they considered the NDP should identify any Local Green Spaces for protection. 98% of respondents (64) agreed that the NDP should include one or more Local Green Spaces. Several suggestions were put forward including Netherwood, the green space and traditional orchard near the Village Hall and the churchyard.
- 5.21 The justifications for the candidate Local Green Spaces are set out in Table 1.

Table 1: Local Green Spaces

Proposed Local Green Space	Close Proximity to Community	Demonstrably Special	Local in Character
1. Netherwood	Several yards from Church and Stoke Lacy village.	Walking and exercise area. Well used and regarded woodland. Netherwood was acquired in 1999 and is managed by the Woodland Trust as one of the 'Woods on your doorstep' created to commemorate the millennium. Within the woodland is an open space for picnicking, play and recreation as well as pathways for woodland walkers.	Nine-acre area of woodland with full public access.
2. Churchyard	Within Stoke Lacy village – very prominent	Use for Village Fayres, events and functions. Also used as a meeting place for Parishioners. Heritage significance as it forms part of the setting of the Grade II listed church and is an important open space within the conservation area.	Integral part of Stoke Lacy community and an important small space in the heart of the village.

- 5.22 The Local Green Spaces which meet the criteria in the NPPF are identified on the Policies Map for Stoke Lacy (Map 3A) and protected in Policy SL4.

Policy SL4: Local Green Space

The following areas as identified on Map 3A: Stoke Lacy Village Policies Map are protected as local green spaces:

- SL4/1 Netherwood; and
- SL4/2 Churchyard.

Development proposals within the local green spaces will be consistent with national policy for Green Belts.

Public Open Space

- 5.23 The Parish has very limited play areas and no playing pitches. There are two small areas of public space which have been incorporated into the Woodland View development.
- 5.24 The Herefordshire Play Facilities Study 2012⁹, in the Rural Action Plans notes that Burley Gate Primary School catchment includes Stoke Lacy (population under 500) which has no formal play provision. This lack of local facilities was noted at the NDP parish meeting on 5th February 2020 when a member of the public commented on the lack of accessible green space for youngsters and that given the number of family houses in the new development there should be a children's playground.

Consultation Responses

- 5.25 The responses to the Issues and Options showed that there was strong support for the provision of a new public open space in the Parish with 88% (57 respondents) agreeing that this should be included in the NDP, if sufficient funding could be identified and secured. The consultation also asked which facilities should be included and a range of suggestions were put forward including 'woods, trees, seating, play area, picnic area, dog walking, provision for children, teenagers, and the elderly'. There were suggestions 'to improve existing facilities at Netherwood, to provide a new space between the two settlements of Stoke Cross and Stoke Lacy and to provide separate spaces for each settlement'.
- 5.26 The consultation responses to the emerging Draft Plan showed that 75% of respondents supported the Draft Policy. There were a number of comments, including concerns about possible disturbance, recognition that spaces may provide opportunities for bringing the community together, and that local people should be involved in identifying and maintaining any open spaces. There was also a suggestion that proposals for a play area should be centrally located to reduce the requirement for car parking.
- 5.27 Policy SL5 supports the provision of a new public open space in the Parish and encourages developers to include contributions to help provide a suitable new space for the benefit of

⁹ https://www.herefordshire.gov.uk/downloads/download/105/play_facilities_study_2012

local people. When recreational green spaces are considered, it is important that on-going maintenance is taken into account.

Policy SL5: Public Open Space

Proposals for new public open spaces to meet local recreational and community needs or improvements to existing spaces should be proportionate to the development concerned. Schemes will be supported where they include one or more of the following:

- Areas of woodland, trees and wildflower planting to support local biodiversity;
- Planting of herbs and local traditional fruit trees and bushes;
- Seating and picnic areas;
- A play area for young children;
- Facilities for teenagers; and
- Accessible and safe provision for older people and those with mobility problems.

Designs should ensure accessibility for all through provision of adequate car and cycle parking and safe pedestrian and cycle access and paths. Preferably proposals should be centrally located, within walking distance of residential areas but sited and designed to minimise disturbance and protect residential amenity.

All schemes should be designed to minimise future maintenance costs and be designed in consultation with the local community.

6.0 Built Character

Introduction

- 6.1 Development in the Parish of Stoke Lacy is concentrated in the two small villages of Stoke Cross almost in the centre of the Parish and Stoke Lacy just to the south. These two settlements include fields and orchards. They are linked by the A465 and separated by more open fields.
- 6.2 The settlement of Stoke Lacy includes the parish church of St Peter and St Paul, the Old Rectory, Nethercourt, several Victorian cottages, a number of houses built in the mid-1900s, and the residential conversion of Hop Kilns and other former farm buildings.
- 6.3 Stoke Cross includes the Village Hall, the Plough Inn (the only local pub), Wye Valley Brewery (the main employer of the area) and a small industrial estate. From 1938, Symonds Cider and English Wine Company was based in Stoke Cross, and orchards were planted to supply apples for the cider. This company operated as a family firm until it was taken over by Greenall & Whitley in 1984, and then Bulmers in 1989. The plant in Stoke Lacy closed in 2000. Wye Valley Brewery is now located in the village on the Symonds site and produces real ale. Most of the new development in the parish has been concentrated in Stoke Cross, including former council housing, newer housing adjacent to the Plough Inn and on the edge of Woodland View and, most recently, Woodland View itself. Woodend Lane includes a broad range of traditional houses, barn conversions and timber framed properties such as the Grade II listed Folly. There is planning permission for a further housing development (a 'commitment' shown on Map 3B: Stoke Cross Village Policies Map) at the Orchard.
- 6.4 The Parish also includes a small hamlet of 15 houses at Cricks Green, other scattered outlying farms, small holdings, and cottages, with a slightly greater concentration along Woodend Lane and Stokes Lane.

Stoke Lacy and Church of St Peter & St Paul

6.5 The settlement of Stoke Lacy is concentrated around the church of St Peter & St Paul (a Grade II Listed Building). The Church is a fascinating repository for a remarkable history, the bedrock of our community.

- The church building is largely a Victorian restoration but with an arch from Norman times. Artefacts from the Medieval period include a font, Grade II Listed stone cross base (1400) and 6 well-tuned Church bells dating back to 1350 plus highly regarded stained glass windows.
- Amongst the many interesting connections of our Rectors the Church has, in particular, a very strong association with the members of the Morgan family who became famous for the creation of the Morgan Motor Car Company and its 3-wheeler car.
- There are also fascinating connections with the Kempson family (rector, church architect and predecessor of the acting Redgrave family) and Fabian Stedman one of the forefathers of bell ringing (1677) as we know it today.

Bell Tower Captain in the belltower

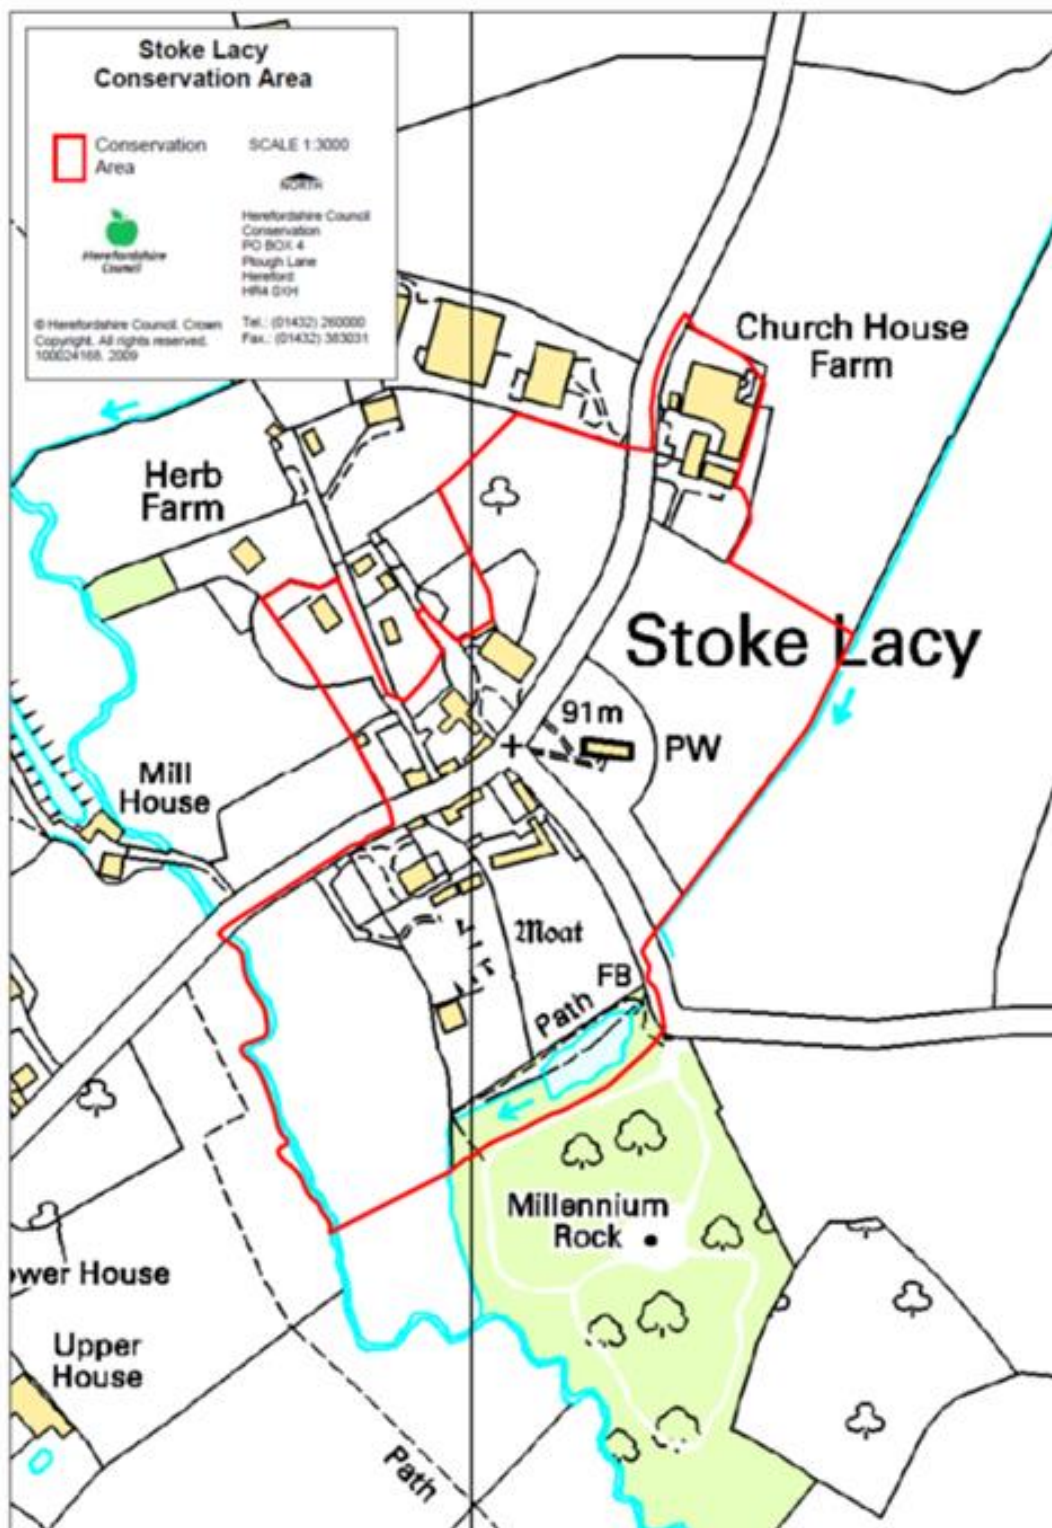

- 6.6 The oldest part of the church is the chancel arch which dates from the 12th century when the manor was held by the De Lacy family. The church also boasts a 16th century carved oak screen and some well-carved Victorian choir stalls as well as a plain medieval font and a Victorian pulpit. The stained glass and memorials are largely 19th century.
- 6.7 The church porch contains two stained glass windows one of which is dedicated to Peter Morgan whose father HFS Morgan was founder of the Morgan Motor Company. HFS Morgan's father and grandfather were Rectors of the church between 1887 and 1937. The family graves are in the graveyard.

Stoke Lacy Conservation Area

- 6.8 Conservation areas are 'areas of special architectural or historic interest, the character and appearance of which it is desirable to preserve or enhance'¹⁰. Conservation areas are designated by local planning authorities (here, Herefordshire Council) to protect the special architectural and historic interest of a place – in other words the features that make it unique and distinctive. Although conservation area designation may mean some additional planning controls and considerations, these exist to protect the elements which make the place special. Unsympathetic changes can erode the special character of the area over time.
- 6.9 Stoke Lacy conservation area was designated in 1993 and is located in the centre of the settlement, around the church and built heritage linked to the Morgan family. The conservation area also includes two large farmhouses and their farm buildings.
- 6.10 The extent of the Conservation Area is shown on Map 5. Details of the conservation area can be found in Appendix 2.
- 6.11 Buildings within the conservation area, like others in the village, are of a mix of materials and styles; the church is built with stone and its nave and chancel roofs are of slate with the tower being roofed with oak shingles. The other buildings in the conservation area are variously built with brick, stone and painted render and are roofed with slate or tiles. The Design Guidance and Codes document provides more detail about local architecture in the conservation area and village which is defined as Character Area 1. The church is in rock-faced red-grey sandstone with buff dressing and quoins with grey sandstone chancel and slate roofs in the Early-English style. The Old Rectory is constructed of red sandstone rubble and sandstone ashlar with a pitched slate roof and windows are sash. Upper House is constructed in red brick in Flemish Bond, with sash windows, stone lintels a central doorway, two gable ends and a double pitched roof. The original farmhouse includes an ornate cast iron veranda roofed in slate along the full length of the western elevation. The character area also includes some post-war bungalows on Herb Lane and on the access to Little Cowarne.
- 6.12 A number of buildings have been converted to dwellings within the conservation area, including the six barns at Nethercourt, Hop Kilns as well as the former stabling at the Old Rectory now known as The Old Coach House. These structures are constructed in red brick mainly in Flemish Bond, rubble masonry and with hipped slate roofs. The former stable should be replaced with...The building which was the former groom's cottage and garage to the Old Rectory Cottage has been converted and is known as Old Rectory Cottage.

¹⁰ s69(1)(a) Planning (Listed Building and Conservation Areas) Act 1990

Map 5: Stoke Lacy Conservation Area¹¹

¹¹ https://www.herefordshire.gov.uk/downloads/download/50/conservation_areas_-_maps

Newton Farmhouse Grade II Listed – late 15th Century

Listed Buildings and Other Built Heritage

- 6.13 Stoke Lacy parish has 33 Grade II Listed Buildings including the church, houses, farmhouses, barns, hop kilns, a wall and a churchyard cross base. A Grade II listing indicates buildings are 'of special interest warranting every effort to preserve them¹².' Some of the individual listed buildings form part of a group of listed buildings, and if so, are grouped together in the descriptions. Appendix 3 includes Map 6 with the location of all the listed buildings in the Parish and excerpts taken from the original listings. Where possible detail of subsequent changes and conversions to buildings have been outlined.
- 6.14 The Moat at Nethercourt and the Motte at Stoke Cross have had recent excavations and the existence of the moat is proven and we are advised by a local landscape historian that Laser Imaging using LIDAR confirms the presence of the Motte as well. Hall Place Farm, within the area of the Motte, may be of significant interest as it is believed to have been built over a medieval settlement once known as “la Halle”. In recent times metal detectorists are said to have found clues to a site of a medieval settlement in a nearby field.

Cricks Green and Rural Area

- 6.15 Cricks Green lies northwest of Stoke Cross towards Bromyard with 15 dwellings comprising small holdings and private homes. The A465 runs through the centre of the settlement connecting it with Stoke Cross, Stoke Lacy and Bromyard. Speed is restricted to 50mph through Cricks Green, however it is awaiting a decision on a possible change to 40mph.
- 6.16 Development in the remainder of the Parish comprises scattered cottages, small holdings and farms.

Planning Policy

- 6.17 Core Strategy Policy LD1 – Landscape and townscape sets out that 'Development proposals should: demonstrate that character of the landscape and townscape has positively influenced the design, scale, nature and site selection, protection and enhancement of the

¹² <https://www.gov.uk/government/publications/principles-of-selection-for-listing-buildings>

setting of settlements and designated area.' Core Strategy Policy LD4 Historic environment and heritage assets requires development proposals affecting heritage assets and the wider historic to:

1. Protect, conserve, and where possible enhance heritage assets and their settings in a manner appropriate to their significance through appropriate management, uses and sympathetic design, in particular emphasising the original form and function where possible;
2. where opportunities exist, contribute to the character and local distinctiveness of the townscape or wider environment, especially within conservation areas.

Policy SD1 – Sustainable design and energy efficiency sets out that 'Development proposals should create safe, sustainable, well integrated environments for all members of the community.'

Public Consultation

- 6.18 The responses to the Issues and Options consultation showed that there is strong local support for the NDP to address design. 91% (59 respondents) agreed that the NDP should include detailed policies on design. Comments included concerns that 'local materials should be used such as Herefordshire stone, oak framing, rather than modern red brick to reflect local character and large estates of generic designs should be avoided'. There were also a number of comments 'supporting innovative modern designs which incorporate green technologies, permeable surfaces to manage rainwater and use of solar power and heat pumps'.
- 6.19 The informal consultation on the emerging Draft Plan did not include specific questions about design as the Steering Group was in the process of procuring design codes. However, in the general comments there were concerns that development should not comprise large estates, housing development should be attractive and not urbanise the area, and should be of high-quality sustainable design with an emphasis on sustainably sourced materials and energy efficiency. In addition, developments should have safe access to public highway and take account of local drainage, sewage and flooding issues.

Stoke Lacy Design Guidance and Codes

- 6.20 The Parish Council commissioned the preparation of design codes by AECOM through the Locality Technical Support programme for Neighbourhood Plans.
- 6.21 The Stoke Lacy Design Guidance and Codes document was produced to inform new development proposed in the area. It includes a character assessment of Stoke Lacy Parish identifying three character areas of CA1 Stoke Lacy Conservation Area and Village, CA2 Stoke Cross and CA3 the Outer Plan Area. It details the key characteristics of each area which make the neighbourhood area a special place to live in and visit. The second part of the document then contains design guidance and design codes to promote sustainable development and guide best practice across the Neighbourhood Plan Area. Policy SL6: Achieving and Promoting Good and Sustainable Design in Development seeks to promote a high standard of design in the Plan area by referring to the Design Guidance and Codes.
- 6.22 There are eight Codes covering 01 Pattern and layout of buildings, 02 Green infrastructure, active travel and open space, 03 Views and landmarks, 04 Architecture and details, 05 Materials, 06 Building modifications, extension, conversion and plot infill, 07 Waste, recycling and utilities and 08 Sustainability and building performance. It is expected that all

development proposals requiring the submission of a planning application will use the Design Guidance and Codes in preparing proposals and that the specific principles in the Codes are taken into account. The Design Guidance and Codes will be used in the assessment of development proposals.

- 6.23 It is expected that evidence in the form of a statement or similar will be submitted with the planning application to show how the principles, where relevant and as appropriate, have been taken into account. This statement should be proportionate to the location, type and scale of the proposal.
- 6.24 The identified Character Area boundaries, CA1 Stoke Lacy Conservation Area and Village, CA2 Stoke Cross and CA3 the Outer Neighbourhood Plan Area refer to local character assessment and are not the same as the settlement boundaries identified on the Policies Maps in the NDP.

Policy SL6: Achieving and Promoting Good and Sustainable Design in Development

All development proposals should be designed to a high standard and reflect the special qualities and unique identity of the Plan area. All development proposals should demonstrate how they have taken the relevant Design Codes 01 – 08 in the Design Guidance and Codes document and replicated in Appendix 7 into account. This should be based on an appropriate and proportionate assessment depending on the location, type and scale of proposal.

7.0 Business and Tourism

Wye Valley Brewery and the Plough – Stoke Cross

Local Businesses

7.1 The principle local employers in the Parish are listed below:

- **Wye Valley Brewery** which produces, bottles and distributes real ale it has a small shop on the premises selling beer and Wye Valley related products – employs 60 approx. <https://www.wyevalleybrewery.co.uk> .
- **wcm+a** (West Country Marketing) which produces name and promotional badges and merchandise – employs 60 approx. <https://www.wcma.co.uk> .
- **The Plough Inn** which is the local Pub, Restaurant and functions facility – employs around 5 approx. <http://www.ploughinnstokelacy.co.uk> .
- **W J Fenn Electrical Services Ltd.**, electrical services including domestic, commercial, industrial, agricultural and testing – employs 6. <https://www.wjfennelectricalservices.co.uk>

7.2 Smaller operations include a range of businesses such as fireworks, carpentry and joinery, tyres, jewellery design and manufacture, a blacksmith, photography, artist, writer, garden machinery sales and service, drone and video photography and equestrian services and a wedding venue.

7.3 There is a growing tourist / visitor economy with accommodation provided by the Plough Inn (which also has a restaurant) and in several self-catering holiday cottages and houses that offer Air B&B including holiday accommodation at Mintridge, the Oast and Chaff House.

Planning Policy

7.4 The NPPF sets out in paragraph 84 that 'Planning policies and decisions should enable:

- a) the sustainable growth and expansion of all types of business in rural areas, both through conversion of existing buildings and well-designed new buildings;
- b) the development and diversification of agricultural and other land-based rural businesses

c) sustainable rural tourism and leisure developments which respect the character of the countryside; and

d) the retention and development of accessible local services and community facilities, such as local shops, meeting places, sports venues, open space, cultural buildings, public houses and places of worship.

- 7.5 Paragraph 155 advises, 'To help increase the use and supply of renewable and low carbon energy and heat, plans should: a) provide a positive strategy for energy from these sources, that maximises the potential for suitable development, while ensuring that adverse impacts are addressed satisfactorily (including cumulative landscape and visual impacts).'
- 7.6 Core Strategy Policy RA5 – Re-use of rural buildings advises that 'the sustainable re-use of individual and groups of redundant or disused buildings, including farmsteads in rural areas, which will make a positive contribution to rural businesses and enterprise and support the local economy (including live work units) or which otherwise contributes to residential development, or is essential to the social well-being of the countryside, will be permitted', subject to criteria. Policy RA6 - Rural economy sets out that 'employment generating proposals which help diversify the rural economy such as knowledge based creative industries, environmental technologies, business diversification projects and home working will be supported' subject to criteria. Policy E2 – Redevelopment of existing employment land and buildings seeks to safeguard employment land and buildings from redevelopment to other non-employment uses. Policy SD2 – Renewable and low carbon energy generation advises that development proposals that seek to deliver renewable and low carbon energy will be supported subject to criteria.

Employment Site

- 7.7 During the Regulation 14 public consultation, Herefordshire Council recommended that Wye Valley Brewery and the adjoining Woodend Lane business park should be identified on the policies map and protected as employment land. There is also an outdoor storage business on two sites occupied by NSA Event Bars (Neville Symonds Associates Ltd) adjacent to Drakewell. Stoke Lacy has quite a concentration of commercial businesses and the NDP provides an opportunity to support the retention of the brewery and business park as employment land, if business operations expand to the point where re-location may be necessary. This would help to ensure the area continues to provide accessible local employment opportunities.
- 7.8 Therefore the employment land is identified on Map 3B Stoke Cross Village Policies Map and safeguarded in Policy SL7: Employment Site.

Policy SL7: Employment Site

The Wye Valley Brewery, Woodend Lane Business Park and the outdoor storage business (on two sites) as identified on Map 3B: Stoke Cross Village Policies Map are safeguarded as employment land and buildings.

Proposals which would result in the loss of these employment sites will only be permitted if all of the following criteria are met:

1. The development of the site for other uses would not result in an overall shortage in the quantity or quality of employment land supply in the area;

2. There would be a net improvement in amenity through the removal of a non-conforming use in a residential area and where the alternative use would offer amenity benefits;
3. The proposal would not result in a piecemeal loss of employment land where there is potential for a more comprehensive scheme; and
4. The development would not result in unreasonable restrictions placed on existing businesses and facilities or in any way adversely affect their operation without suitable mitigation being provided by the agent of change prior to the completion of development.

In all cases the viability of the development proposal should be confirmed through an assessment and there must be evidence of appropriate marketing for at least 12 months for a change of use and it can be shown that this marketing has been unsuccessful.

The provision of complementary uses that help to meet the day-to-day needs of the employment sites and their employees will be permitted where they are of an appropriate scale.

Farming in Stoke Lacy

Harvesting potatoes – Newton Farm, Cricks Green

- 7.9 Stoke Lacy is home to a number of different farm businesses, covering crops, livestock, dairy, poultry, apples, and renewables. From smaller enterprises to business passing the million-pound turnover mark, future housing developments should allow these well-established farms to continue the efficient production of high-quality food.
- 7.10 There are a number of small holdings and highly efficient farms, some still run by families whose predecessors have worked the local soil for centuries. Four of the farming families in Stoke Lacy have farmed some part of their farm for the whole of the Queen's reign, with the oldest family being able to trace its roots in the area back to 1864. Throughout the sixties and seventies, hundreds of seasonal workers would descend on the Parish to help local families with hop picking or current picking. Some of these workers have taking up permanent positions in the area where they remain today.
- 7.11 Although farming practices have changed, many of the farms in Stoke Lacy run the same enterprises as they did many years ago, including beef, sheep, cereals, and apples. The biggest changes have been the decline in top fruit, hops and dairy herds. However, as some of these traditional farming practices declined, the Parish has embraced diversifications into more modern farming methods. As well as this, many farms have seen the addition of renewable energy and more sustainable practices so that they can continue producing food to world leading standards while caring for the environment.
- 7.12 In addition to farms, the Parish is also home to a number of people involved in full-time agricultural support businesses. These include machinery businesses, equestrian centres, and an agricultural recruitment company.
- 7.13 During the Regulation 14 consultation Herefordshire Council and CPRE suggested that agricultural development forms a significant proportion of planning applications in the Parish and proposals for intensive livestock units and polytunnels can cause considerable controversy within small rural communities. Policy SL8 therefore provides guidance for such proposals within Stoke Lacy neighbourhood area.

Policy SL8: Agricultural Buildings and Polytunnels Requiring Planning Permission

The growth and expansion of rural businesses through conversions and through well-designed new buildings will be supported where all of the following criteria are met:

1. The character of the countryside is respected;
2. There is an acceptable impact on the amenities of occupiers of neighbouring buildings (including non and residential properties) with particular regard to noise, odour and outlook;
3. Any new buildings or structures are carefully sited and designed to minimise visual impacts and impacts on the landscape. This may include the need for larger scale development to be 'broken up' through careful design and sensitive use of materials and height;
4. Natural materials and an appropriate material colour palette to help blend new buildings into their surroundings are used; and
5. Use of energy and resource efficiency measures are incorporated as appropriate.

- 7.14 During the Regulation 14 public consultation Herefordshire Council and CPRE noted that there was no renewable energy policy in the NDP and that applications for renewable energy schemes are likely to become much numerous in the coming decade. Policy SL9 has been included in the NDP to help guide such schemes when they come forward in the future.

Policy SL9: Proposals for New Renewable Energy Technology Schemes

Small scale renewable energy or low carbon energy proposals that demonstrably benefit the community, and respect local character, residential amenity and highway safety will be supported.

Such schemes should be located on brown field sites or be roof mounted and avoid the use of productive agricultural land.

Apple orchard, Stoke Lacy

Home working

- 7.15 Home working has become more common in recent years, and the Covid-19 pandemic has led to increased pressures for many more people to work from home. Access to high-speed broadband and reliable mobile signals are essential for rural businesses and those working from home.
- 7.16 Although Stoke Lacy and the surrounding area has been part of the government led 'Fastershire' project, not all houses yet have access to high-speed broadband and still rely on other service providers such as BT, 3 and Sky. Gradually, the old copper lines are being upgraded to optical technology and BT are planning to convert the PSTN Network to an IP Core by 2025. Mobile signals in the area of Stoke Lacy are poor and the most prominent signal is provided by EE and Gigaclear.

Public Consultation

- 7.17 In the Issues and Options consultation 98% of respondents (64) supported a policy on local business growth and tourism in the NDP. There were a number of suggestions linked to tourism including 'support for tourist accommodation including conversions', although some comments were against this, for instance 'due to the narrow width of roads and the lack of infrastructure', there were concerns about 'caravan parks, static homes, and camping'. There were suggestions 'for exploring opportunities linked to footpaths, wildlife, and local heritage'. Comments also noted 'the need to support local traders, suggestions for small start-up units, extending Woodend business park and a farm/local shop'. There were also a number of suggestions for actions including 'improving signage and footpaths, and provision of electric charging points at the Village Hall'. These will be considered by the Parish Council.

- 7.18 The responses to the consultation on the emerging Draft Plan were largely supportive of the Draft Policy, with 75% of respondents supporting the Policy. However, comments included concerns about tourism, the need to limit proposals to small scale schemes, and potential impacts of development on the rural area, particularly from traffic on rural roads, access issues, noise and light.
- 7.19 Policy SL10 has been prepared to support appropriate and small-scale tourism and local business-related development in Stoke Lacy.

Policy SL10: Tourism and Rural Enterprise

Development proposals for small scale tourism and rural enterprise will be supported in Stoke Lacy Parish where they conform to the relevant Design Codes and:

1. Development comprises the sensitive conversion of former agricultural buildings or where new development is proposed, development is of a high design quality which is sensitive to the character of the surrounding rural area;
2. Schemes provide visitor accommodation or small business units to support local rural diversification and employment opportunities;
3. Suitable and safe access is provided that encourages active travel modes as the preferred mode of transport, and there is adequate on-site car and cycle parking for visitors and occupants;
4. Applicants can demonstrate that the local highway network is adequate in terms of design and capacity to cater for any increases in traffic generation; and
5. The amenity of any neighbouring residential areas is protected, and noise, odour and light pollution are minimised.

Proposals for farm/village shops and cafes will be encouraged.

8.0 Accessibility and Transport

Bus Stop

- 8.1 Transport and accessibility are important issues for many local residents in the Stoke Lacy Neighbourhood Area. The A465 runs through the Parish connecting the two main settlements of Stoke Cross and Stoke Lacy to Hereford, Bromyard, and via the A44, to Worcester and Leominster. Public transport is limited and reportedly unreliable through the parish. As at April 2022, the 420 bus service operates through Stoke Lacy along the A465. There are 5 buses per weekday travelling from Stoke Lacy to Worcester via Bromyard and 3 buses daily at weekends. There are 6 buses to Hereford on weekdays and 3 buses daily at the weekend. Connections via public transport are poor to other market towns such as Leominster and Ledbury. The nearest rail station is at Hereford.
- 8.2 Enforced, as a result of poor public transport, most residents rely on private cars to access education, employment opportunities, shops and local facilities. The 2011 Census showed that car ownership was relatively high with 76.2% of households having access to 1 or 2 vehicles. It is likely that this figure has increased in recent years in line with national trends, and it may continue to do so, possibly with greater reliance on electric vehicles which require provision of suitable charging points.
- 8.3 Whilst the two main settlements are connected by the A465 they are not connected by an official, or safe, footpath. There is a very narrow track next to the A465 which has been deemed to not be wide enough by the highways department and is not maintained and which, dangerously, does not run the length of the road between the settlements. Only on one side of the road is there a footpath that links most of the houses of Stoke Cross along the A465. There is not a safe designated crossing area.
- 8.4 There are various other indirect public footpaths linking the settlements to each other and the wider rural area (see Appendix 4 Map 7). Public Footpaths in Stoke Lacy Parish). A new

parish council footpaths officer has provided a comprehensive review of the 9 public rights of way around the Parish. It is hoped that repairs will be made to some of the bridges which are currently closed to public access.

- 8.5 At the public meeting on 5th February 2020, residents advised they 'would like to see public rights of way well maintained and improved. Some paths are currently closed or obstructed. Landowners should be made aware of their responsibilities and encouraged to install gates and dog-friendly stiles so that there is accessibility for the public to exercise their dogs and improved accessibility for the less able, disabled, and young children'. (These points are being promoted by our Parish Footpaths Officer.)

Planning Policy

- 8.6 The NPPF promotes more sustainable transport options such as walking, cycling and the use of public transport wherever possible. Paragraph 104 sets out that 'Transport issues should be considered from the earliest stages of plan-making and development proposals, so that: c) opportunities to promote walking, cycling and public transport use are identified and pursued. Paragraph 106 advises that 'Planning policies should: d) provide for attractive and well-designed walking and cycling networks with supporting facilities such as secure cycle parking (drawing on Local Cycling and Walking Infrastructure Plans).'
- 8.7 Core Strategy Policy MT1 – Traffic management, highway safety and promoting active travel advises that 'Development proposals should incorporate the following principle requirements covering movement and transportation: 2. promote and, where possible, incorporate integrated transport connections and supporting infrastructure (depending on the nature and location of the site), including access to services by means other than private motorised transport; 3. Encourage active travel behaviour to reduce numbers of short distance car journeys through the use of travel plans and other promotional and awareness raising activities; and 5. protect existing local and long distance footways, cycleways and bridleways unless an alternative route of at least equal utility value can be used, and

facilitate improvements to existing or provide new connections to these routes.' Herefordshire Council's Highways Design Guide for New Development¹³ should be followed.

- 8.8 Additional development in the area may lead to increased pressures on road networks. Development should support movement by means other than the private car wherever possible, as well as linking to existing walking and cycling networks and supporting improvements wherever feasible. Reduced reliance on the private car, particularly for short journeys would have a number of benefits for the Parish including lower carbon emissions and improved air quality, reduced noise pollution and improved health and wellbeing. Support for electric vehicles (cars and cycles, and possibly scooters) could also form part of the measures to reduce carbon consumption and emissions locally.
- 8.9 The hilly terrain, remote location and the speed and amount of traffic on the A465 mean few people use cycles or walk for travel outside the Parish and cycling and walking are mainly seen as leisure activities. However, there may be opportunities over the next few years to promote walking and cycling as sustainable transport alternatives, particularly for short and local journeys.

Public Consultation

- 8.10 The responses to the Issues and Options consultation showed that local people considered that the NDP should promote sustainable travel with 91% of respondents (59) supporting such a policy. There were a number of suggestions for possible actions for the Parish Council to progress in partnership with other organisations, including improvements to bus services. Comments related to planning policies included the suggestion that 'new houses should have vehicle charging points, there was a need to link new development to footpaths and improvements to accessibility and safety for cycling should be supported. There were also concerns that cycle lanes (eg on the A465) would require road widening'.
- 8.11 77% of respondents to the consultation on the emerging Draft Plan supported the Draft Policy. Negative comments included concerns that the expectations are unrealistic and pointless but there were also suggestions that there is a need to be flexible to allow for changes to vehicles and travel in the future, sites should not rely on cars or be in remote areas and the provision of a safe pedestrian pathway between 'up' and 'down' areas of the village is a high priority.
- 8.12 Policy SL11 has been prepared to encourage new development to promote more sustainable travel and improved accessibility for all.

Policy SL11: Improving Accessibility and Sustainable Travel

Proposals for new development and conversions should promote and encourage walking and cycling and use of public transport. Wherever possible, schemes for new housing and employment related development should conform to Design Code 02 Green infrastructure, active travel and open space and:

1. Develop and enhance pedestrian and cycle route links to local amenities and bus stops;
2. Provide suitable and secure storage provision for bicycles;
3. Include external electric charging points for vehicles and bicycles;

¹³ https://www.herefordshire.gov.uk/downloads/download/585/highways_and_new_development

4. Provide street connections to enhance connectivity within and through the development and parish, particularly by improving pedestrian and cycling connectivity along the A465, to existing Public Rights of Way, and to the countryside; and
5. Include active travel infrastructure, such as where it enhances links and connects developments to public transport.

- 8.13 The NDP cannot include measures such as traffic management as part of planning policies but can include separate 'Actions for the Parish Council' to help address issues that fall outside a planning policy document. The NDP Steering Group has considered the various suggestions put forward during the Issues and Options consultation and a number of proposed actions are set out in document 'Community Comments' that can be found on the website, for possible progression by the Parish Council working with other organisations and local people.

9.0 Housing

Housing at Stoke Lacy

Introduction and Context

- 9.1 Stoke Lacy has a particular character of scattered dwellings amid hedged fields and wooded areas. A few buildings dominate but most nestle into the surrounding landscape. Houses have been built in ones and twos over the centuries to meet the needs of the community, though there is now a slightly greater density of housing within the two settlements of Stoke Lacy and Stoke Cross. A diverse mix of style, materials and size, has given Stoke Lacy an informal character.
- 9.2 Some farm buildings have been converted to domestic dwellings as the need for labourers has dwindled and farm sizes have increased. Cottages and rooms are increasingly being used as holiday lets.
- 9.3 Small groups of council houses were built at Westbury, Stoke Cross and Cricks Green, but most are now in private ownership. There were 24 properties within the Parish which were described as 'social housing' in the 2011 Census.
- 9.4 An estate of 28 houses in Stoke Cross, Woodland View, was completed in 2019. Its scale, density, building design and location has led to criticism from some parts of the community. This development has served to illustrate the importance of ensuring that housing policies and proposals in the NDP are informed by extensive community consultation and engagement.
- 9.5 Another estate of 10 houses also in Stoke Cross, has outline planning consent (Ref: P172292/O Erection of 10 dwellings including 2 x 3 bedroomed bungalows, new vehicular access and associated works including area for Village Hall on Land adjoining Stoke Lacy Village Hall Stoke Lacy Herefordshire). An application for approval of Reserved Matters has

been made to Herefordshire Council. At an open meeting in February 2020, members of the community expressed no objection to new people moving into the area - their objection was to estates with questionable environmental standards and inappropriate specifications. Young people who wish to remain in the area and an increasing ageing population have had difficulty finding appropriately sized homes in the area and so have had to move away.

- 9.6 Windfall is a site that has not been specifically identified within a Local Plan. Therefore, all of the previous development within the parish during the plan period is defined as windfall, including the Woodland View development, and this affects the average figures. Table 2 provides information about past windfall figures for the parish during the current plan period since 2011.

Table 2: Windfall Development

	Completions, all windfalls
2011-2012	0
2012-2013	0
2013-2014	0
2014-2015	1
2015-2016	0
2016-2017	0
2017-2018	3
2018-2019	0
2019-2020	28
2020-2021	0

- 9.7 The Parish may experience further pressure for growth and development in future years. By law planning applications are determined in accordance with the development plan unless material considerations indicate otherwise¹⁴. The Herefordshire Core Strategy Local Plan is currently being reviewed and if the County does not have an up-to-date Local Plan and a 5 year supply of housing land, it is very difficult for Herefordshire planners to resist new proposals. NDPs have to plan positively for new development.
- 9.8 NPPF paragraph 29 sets out that 'Neighbourhood plans should not promote less development than set out in the strategic policies for the area or undermine those strategic policies'. Paragraph 70 notes that 'Neighbourhood planning groups should also give particular consideration to the opportunities for allocating small and medium-sized sites (of a size consistent with paragraph 69a) suitable for housing in their area.' Paragraph 78 goes on to say, 'In rural areas, planning policies and decisions should be responsive to local circumstances and support housing developments that reflect local needs' and paragraph 79 advises 'To promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities.'

¹⁴ See NPPF footnotes 2 and 3. Footnote 2: The development plan includes local and neighbourhood plans that have been brought into force and any spatial development strategies produced by combined authorities or elected Mayors. Footnote 3: 3 Section 38(6) of the Planning and Compulsory Purchase Act 2004 and section 70(2) of the Town and Country Planning Act 1990.

Settlement Boundaries and Planning Policy

- 9.9 Settlement boundaries show the extent of the built-up area of settlements on a map and are used to direct development so that it is concentrated within or adjoins existing built form. This supports a more sustainable pattern of development which supports local use of facilities and services such as the Village Hall, pub and bus stops and local employment opportunities. Conversions, in-fill sites and small-scale development proposals are acceptable within the identified Stoke Lacy and Stoke Cross settlement boundaries in principle, subject to meeting the requirements of all relevant planning policies and Design Codes.
- 9.10 Outside the settlement boundaries opportunities for new development are much more limited. Rural development proposals should satisfy criteria set out in Policy RA3 Herefordshire's Countryside and H2 Rural exception sites in the Herefordshire Local Plan Core Strategy and other relevant policies including:
- Policy RA4 Agricultural, forestry and rural enterprise dwellings
 - Policy RA5 Re-use of rural buildings, and
 - Policy RA6 Rural economy.

Public Consultation

- 9.11 For the Issues and Options public consultation, the Steering Group prepared two options for settlement boundaries, for each of the two settlements.
- 9.12 The responses to the Issues and Options consultation showed that there was a preference for Option A for Stoke Cross, with 72% of respondents (47) supporting this option. Option A was preferred for Stoke Lacy also, with 65% of respondents (49) supporting this option. The two Option As were for relatively 'tight' settlement boundaries where opportunities for new development would be more limited.
- 9.13 There were a number of detailed comments in response to the questionnaire with concerns that 'the proposed boundaries were not tight enough and would allow for too much development, that greater flexibility in the rural area is needed, there is a need to protect rural identity, the consultation was too narrow and did not consider 'no development', and the church and graveyard should be removed. The settlement boundaries should protect the individual identities of the two settlements and protect them from merging'. These comments were considered by the Steering Group and resulted in the settlement boundaries being drawn tighter around existing housing and excluding the church and churchyard in Stoke Lacy and known flood areas.
- 9.14 The responses to the consultation on the emerging Draft Plan showed that there was support for the proposed settlement boundaries with 75% of respondents supporting former Policy SL8. Comments included general support, that development proposals (site allocations) were outside the boundary, there is a lack of space to develop and that the lack of local facilities makes development difficult to justify. The Steering Group considered the comments and made some changes to the settlement boundaries in the Draft Plan and to the former Draft Policy. The commitment for 10 houses at the Orchard and Site allocation SL16/1 are also now included on the Policies Map (Map 3B).

- 9.15 Policy SL12 has been prepared to guide new housing development within the settlement boundaries. The settlement boundaries are shown on the Policies Maps, Map 3A and 3B. Residents are concerned that developments should be small in scale and infill rather than comprising major development¹⁵.
- 9.16 The Design Codes also refer to the need for new development to be character-led, meaning that development density should be low and small in scale. In Character Area 01 Stoke Lacy Conservation Area and Village, this means that roadside facing development should be restricted to ones or two and that communal access and development that extends further than one plot back is characteristic. In Character Area 01 Stoke Cross, this means that development dwelling quantities should be restricted to no more than six and no more than two dwellings facing the A465 with a primary elevation. It is important that the relevant Design Code is taken into account.
- 9.17 Infill development is development that goes in the gaps between existing buildings and such proposals also should be small in scale. Following the Regulation 14 public consultation the settlement boundaries were amended to improve consistency.

Policy SL12: Development within the Settlement Boundaries

Proposals for new housing development will be supported within the identified Settlement Boundaries of Stoke Cross and Stoke Lacy as shown on Map 3A: Stoke Lacy Village Policies Map and Map 3B: Stoke Cross Village Policies Map where they conform to the relevant Design Codes and:

1. Proposals should be low density and small scale in nature taking account of the relevant Design Code for the Character Area in which they are located;
2. Suitable and safe access is provided particularly where this encourages active travel;
3. The amenity of neighbouring and future residents is protected;
4. Development does not exacerbate flood risk and where possible provides a betterment; and
5. Suitable drainage and wastewater treatment is provided in line with Herefordshire Local Plan Core Strategy Policy SD4 Wastewater treatment and river water quality.

Options for Housing Sites

- 9.18 The Parish Council undertook a Call for Sites in 2020 and 12 proposals were put forward. These were subjected to a technical assessment undertaken by consultants AECOM. The outcome of this assessment is published on the NDP website - see Stoke Lacy Neighbourhood Plan Site Options and Assessment Report, February 2021.

Public Consultation

- 9.19 The Issues and Options survey also asked the Community about the number of new houses that should be provided in the Parish up to 2031. Responses were split. 26% (17

¹⁵ PPG para 040 ref id 41-040-20160211

respondents) supported each of the options for 0-5, 6-10 and 11-15 new houses. 17% of respondents (11) supported 16-20 houses and 5% (3) supported 20+ new houses.

9.20 Comments included concerns about '*larger estate type development*' and preferences for '*smaller sites*', with suggestions that '*there should be more development in the Stoke Lacy settlement in the future*'. A question of the density and location of developments was not clearly covered in the questionnaire.

9.21 The consultation on the emerging Draft Plan asked residents and stakeholders for their opinions on the sites identified in the AECOM Technical report as suitable for housing or suitable subject to constraints being overcome. These were:

- Site 3 (Crossfield House) for 8 houses
- Site 4 (to the north of Westbury Road, Stoke Cross) for 7 houses
- Site 5 (to the east of Westbury Road, Stoke Cross) for 10 houses and
- Site 6 (to the east of the Parish Hall, Stoke Cross) for 6 houses.

9.22 A Table showing the responses is provided in Appendix 5. There were also a large number of comments, both in support of and objecting to each site. Overall, there were more objections than support for each site, although a significant proportion of respondents (ranging from 23% - 30%) were neutral or did not answer. Comments included concerns about the scale of development proposals, urban creep, traffic and access issues, negative impacts on local wildlife and other residents, and flooding and drainage / sewage issues.

9.23 The landowners of Site SL12/1 Crossfield House have confirmed to the Parish Council that the intention is for the site to be developed for two low-density, detached, self-build properties with garden areas to include suitable space for play, and fruit and vegetable growing. The existing vegetable patch and pond in the north of the site would be retained with access provided the new development. The following site allocation is therefore identified in the Plan.

Site Allocation SL12/1: Crossfield House, Stoke Cross

The part of the garden at Crossfield House, Stoke Cross as shown on the Map 3B: Stoke Cross Village Policies Map is allocated for housing development for 2 dwellings.

@Crown copyright [2021] Ordnance Survey 100055940 on behalf of Stoke Lacy Parish Council
100061610

Development will be supported where:

1. Suitable and safe access for all modes is provided to the A465 from the existing narrow road south of Woodland View and appropriate visibility onto the A465 is demonstrated;
2. Existing hedgerows and the pond on the site are retained where possible; and if removed mitigation measures include replacement / relocation and planting schemes use appropriate local native species; and
3. Suitable mitigation measures are provided to protect and enhance the Priority Habitat area of Traditional Orchards to the south of the site.

Newton Farm, late 15th Century

Woodland View, completed 2019

House Types and Sizes

- 9.24 Stoke Lacy Parish includes a range of house types and sizes from traditional rural cottages and farmhouses to more modern developments such as Woodland View and the Orchards (yet to be developed)
- 9.25 At the Parish NDP meeting on 5th February 2020, concerns were expressed that '*although local people had been able to buy houses on the new development at Newlands [Woodland View], there were no affordable rental properties for local families*'.
- 9.26 The 2011 Census recorded 167 dwellings in the Parish. Of these 113 or 67.7% were detached whole houses or bungalows and 42 (25.1%) were semi-detached whole houses or bungalows, showing that the Parish has a relatively high proportion of larger housing. In terms of tenure, of the 151 households, 116 (76.8%) owned their properties, none were in shared ownership (part owned and part rented), 22 (14.6%) were in social rented accommodation and 12 (7.9%) were in private rented housing.
- 9.27 The **Housing Market Area Needs Assessment Final Report July 2021**¹⁶ identifies a number of housing market areas and Stoke Lacy parish falls within the Bromyard HMA. Detail is provided in Section 14. Paragraph 14.7 sets out that 'The size profile of the Bromyard HMA's housing stock follows a broadly similar pattern to the Herefordshire average. The number of 3-bedroom properties account for the highest proportion of all dwellings in the HMA at 41.0% followed by four bedroom properties.' Paragraph 14.8 goes on to say 'The provision of affordable housing delivery has been below average with 17% of all completions providing affordable housing which is below the County average of 23%.'
- 9.28 Appendix 6 includes the relevant extracts in relation to Local Housing Need for the Bromyard Housing Market.
- 9.29 The study notes that 'The population's age structure across the HMA as a whole is focussed more so on an older population with a particular concentration of those aged 50 and over in the rural area in comparison to the Herefordshire average' (para 14.11).
- 9.30 The recommended housing mix for the rural area has an emphasis on smaller units of 1-3 bedrooms across all tenures (see Table 14.11 Bromyard HMA Recommend Housing Mix by Tenure by Size).

¹⁶ <https://www.herefordshire.gov.uk/downloads/file/22548/herefordshire-housing-market-area-needs-assessment-july-2021>

Public Consultation

- 9.31 In the Issues and Options consultation, residents were asked about what type of house types and sizes were needed in Stoke Lacy Parish. Family houses had the highest level of support with 72% of respondents (47) ticking this choice, followed by starter homes, affordable homes, and housing for older people. A number of detailed comments were also submitted including “suggestions for larger detached homes with gardens, smaller houses, high quality and attractive housing, a mix of house sizes, housing for young families, the need for more technical information to understand need better, individual homes, and homes for local people only”. Former NDP Draft Policy SL10 supported the provision of a suitable housing mix in the Parish. The questionnaire did not differentiate between existing or new houses needed.
- 9.32 The responses to the consultation on the emerging Draft Plan showed that 74% of respondents supported the Policy. Comments included concerns that larger houses are needed for people working from home, support for houses for young people and self-build schemes but also concerns that starter homes should not be provided when there is a lack of facilities. There was also support for more housing for older people and family housing and for infill / garden development.
- 9.33 Policy SL13 sets out the preferred house types in the Parish.

Policy SL13: Housing Mix

New residential development should demonstrate how it contributes to a suitable mix of tenure, type and size of dwelling across the Stoke Lacy Neighbourhood Area based on the latest available evidence of housing need.

Proposals should demonstrate how they respond to local needs for medium sized family housing (up to three bedrooms) with gardens, starter homes of two bedrooms, and housing designed for older people if evidenced by the latest available housing needs and viability considerations.

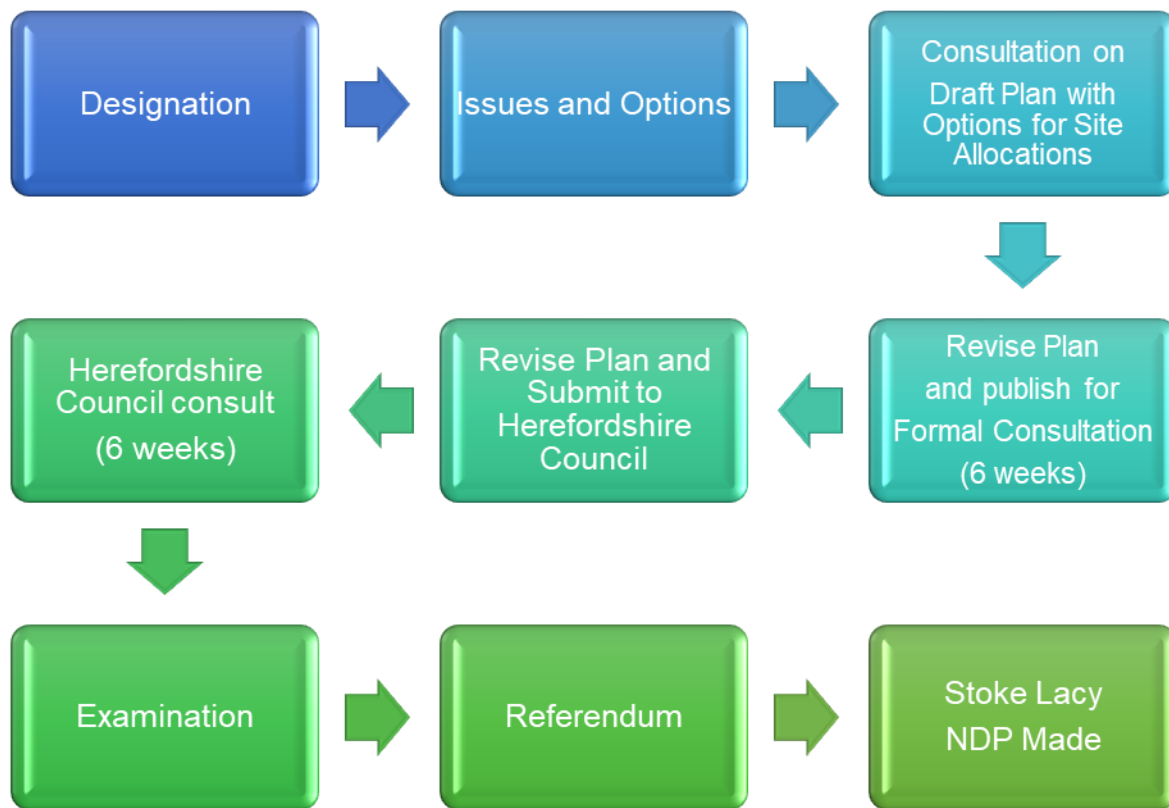

Self-build schemes and schemes for larger housing which provide flexible space for homeworking will also be supported providing they conform to the Stoke Lacy Design Codes.

10.0 Next Steps

- 10.1 The NDP will be subjected to a local referendum. If more than 50% of those voting, vote in favour of the plan then it will be made by Herefordshire Council.
- 10.2 The Plan then becomes part of the 'development plan' for the area and is a statutory consideration in guiding future development and in the determination of planning applications within the plan area.

- The Victorian church of St Peter and St Paul and its churchyard
- The land between the church and the 18th Century Church House Farm and its barns.
- The substantial Victorian former farmhouse known as Nethercourt and its six barns including two hop kilns, formerly agricultural buildings but since converted to dwellings in the late 1990s.
- Land leading down to the river on the south banks of the river Lodon and surrounding the Nethercourt barns, running parallel with Hopton Lane including a pond adjacent to Nether Wood, the community woodland.
- In the grounds of what is now known as Orchard Barn is the remains of a moat construction.

On the western side of the A465: -

- Two Victorian red-brick farm cottages previously associated with Nethercourt.
- The Old Rectory, including the large garden and grounds of this building which has now been divided into three separate dwellings.
- Stoke House and grounds, a large detached 1930s house, built by the Morgan family for their daughter Dorothy.
- The Old Coach House converted stabling and garden buildings formerly associated with the Old Rectory.
- Old Rectory Cottage, the former dwelling of the coachman and later chauffeurs of the Morgan family when living at the Rectory.

Appendix 3 Listed Buildings¹⁷

Map 6: Location of Listed Buildings in the Parish

¹⁷See <https://historicengland.org.uk/listing/the-list/advanced-search>

Key to Map 6

a. Mintridge Farm (1234687) – 4 listings

Mintridge dates from the late 16th or early 17th century, the farmhouse is timber framed with painted noggin and a tile roof, together with barns, one to the north east of the farmhouse, a 17th century stone, timber frame with red brick noggin and weather boarded range on sloping ground with stone ramp up to doors in an L-shaped plan with vertical lights in the stone wall and a brick built early 18th century barn with steps up to the loft. Also, a late 17th century stable buildings of stone rubble and machine tiles.

b. Grove Farmhouse (1275981) - 1 listing

The Grove farmhouse is a late 16th century timber frame and red brick noggin house. Two storeys. Casements. Slate roof with gable ends. Stone foundations. Large early C20 red brick addition.

c. Newton Farmhouse (1234685) - 3 listings

Newton farmhouse is a late 15th century timber framed building with other parts dating from the 16th and 17th centuries. It is on a T shaped plan with a cross wing at the south. Associated with the farmhouse are two barns, to the east is a stone rubble 18th century barn with narrow window slits and a machine tiled roof. To the south east is a stone rubble 18th century barn with steps up to the loft.

d. Merrifield Farmhouse (1234682) – 2 listings

Merrifield Farmhouse is a mid-18th century house of stone rubble. Two storeys. Three windows, sashes with glazing bars. Two canted bays on ground floor with glazing bars. Central door with modern porch. Square plan. Hipped slate roof with steep pitch. Associated with this house are a 17th and 18th century stone rubble barn with timber frame and brick in gable end. Corrugated iron roof. Adjoining twin-roundel hop kilns without roofs.

e. Hall Place (1234679) – 5 listings

Situated in the Stoke Cross area Hall Place and dating from around 1600, it is a T-shaped plan with cross-wing at the west end. There is an exposed timber frame, partly rendered, painted brick noggin. Two storeys. Four windows, casements. Slate roof. Together with its barns it forms a group. There is one barn to the north and another to the north west of the house, both made of stone rubble and dating from the 17th and 18th centuries. There is a barn and hop kiln to the south west of the property, the hop kiln has since been converted to a dwelling. To the south west of the site is a wall built from stone rubble with stone coping dating from the 18th century.

f. The Folly (1276016) – 1 listing

The Folly is an early 17th century timber frame house. Two storeys. Three windows, casements. Tall gable end has barge boards moulded and enriched with dentials and finial.

g. Upper Woodend (Woodend Farm) – 4 listings

Upper Woodend (Woodend Farm) is a Late 16th century house with timber frame and plaster panels. It has slate roof with gable ends. Two storeys and attics. Three windows, casements. Gabled dormer. Diagonal rubble chimneys. Associated with this property are three barns and

a hop kiln, one to the north is a 17th century timber frame barn, partly weather boarded, with a stone plinth and a stone rubble 17th century barn to the west. To the south there is a stone barn and round brick built 17th or 18th century hop kiln. The barn and hop kiln are now converted into dwellings.

h. Huddle Mill house and mill (1234409) – 2 listings

This house and mill have largely fallen into disrepair but in 1962 the buildings were listed as 17th century cottage. Timber frame. One storey and attic. Casements. Slate roof with gable ends. Red brick and rubble. Slate roof with gable ends. Adjoining hop kiln, square with pyramid slate roof. Most of the slates have fallen.

i. Church House Farm (1234406) – 3 listings

Church House Farm is a brick-built 18th century farm house with 19th century alterations and features. Stucco partly tile hung. Two storeys. Four windows. Gabled porch wing with shaped bargeboards. Tile roof with gable ends. In this group of buildings, a 17th or 18th century barn and hop kiln. Stone rubble barn. Machine tile roof with gable ends. Adjoining red. brick round hop kiln with slate conical roof and to the north a 17th century timber frame and wattle panelled barn, some panels are open, partly weather boarded. Tile roof with gable ends. Church House farmhouse is in the conservation area.

j. Lower Hopton (1234410) 1 listing

Lower Hopton is a Late 18th century roughcast house. Three storeys. Three windows, sashes with glazing bars. Central panelled door, porch with slender columns. Slate hipped roof.

k. Hopton Sollars Farmhouse (1176353) – 2 listings

Hopton Sollars is a 18th century painted stone rubble house with slate hipped roof. 2 storeys casements. C17 timber frame cross-wing with painted brick noggin, slate roof with gable ends, easements. There is also to the north an 18th century long stone range barn with tile roof and gable-ends.

l. Stoke Lacy Mill (1234407) – 1 listing

The mill is an 18th century red brick building with stone plinth. Casements with segmental heads. Brick dentil eaves. Tile roof with gable ends.

m. St Peter & St Paul Church Stoke Lacy and Churchyard Cross (1276172) – 2 listings

Parish church of 1863 by F.R. Kempson, incorporating some fittings from a previous church.

MATERIALS: Rock-faced red-grey sandstone with buff dressings and quoins; different grey sandstone for the chancel. Slate roofs

PLAN: Nave, lower and narrower chancel, south porch, west tower and spire, north vestry.

EXTERIOR: An Early-English style parish church of which the heavy 3-stage tower is prominent. It has clasping buttresses and semi-circular north-east turret that turns polygonal in the second stage. The west window is a single cusped light. Paired bell-stage windows have a central column and are superimposed by an arch with solid tympanum. An arcaded frieze at eaves level is below the splay-foot shingled spire. The nave has 2-light windows and

corbel table to cast-iron rainwater goods. A stack on the east verge has a round shaft. The porch has a simple pointed entrance and the south nave doorway is similar. The chancel has a single-light south window and east window of 3 stepped lancets.

INTERIOR: The broad tower arch has a continuous chamfer. The chancel arch, a reconstruction of the arch in the old church, is Norman in style with semi-circular responds, scalloped capitals and stepped arch. The nave has a trussed rafter roof, the chancel a plastered barrel ceiling on corbelled shafts, and an elaborate cinquefoil piscina. Walls are plastered. Floors are C19 tiles, with wood floors beneath pews.

PRINCIPAL FIXTURES: A chancel screen is made up from parts of a C16 screen, and includes delicate openwork tracery and foliage cornice. The octagonal tapering tub font is medieval. Other fittings are 1863 or later. The round stone pulpit has rich diaper work. Benches are simple but the choir stalls have Gothic panels to ends and fronts. There are several stained-glass windows, of different dates. They include the east window, showing the life of Christ, post 1886, and in the nave Christ preaching, post 1887, and the marriage at Cana by Kempe & Co, post 1929. There are several wall monuments of the late C18 and C19, including a sarcophagus to John Lilly (d 1825) in the nave and, in the chancel, an oval tablet with an awkward-looking mourning putto leaning on an urn, to Thomas Griffith (d 1800). In the tower base is a benefaction board of 1837.

HISTORY: Parish church built in 1863 by F.R. Kempson (1837/8-1923), whose father had been rector of the church. Kempson started his career in London but moved his practice to Hereford in 1861 and received many commissions in the county. Kempson reconstructed the chancel arch of the previous church, from which some of the fittings (screen, font, wall monuments) were reinstated in the new church.

SOURCES: N. Pevsner, *The Buildings of England: Herefordshire*, 1963, p 293.

REASONS FOR DESIGNATION: The church of St Peter and St Paul, Stoke Lacy, is listed Grade II for the following principal reasons: * It is a C19 Gothic-revival church retaining original character and detail. * It retains its medieval font and parts of a medieval screen, and C19 detail including some good stained-glass windows.

To the south of the church is 14th century base of churchyard cross.

The church and churchyard cross are in the conservation area.

n. Barn to North East of Nethercourt (1276120) – 1 listing

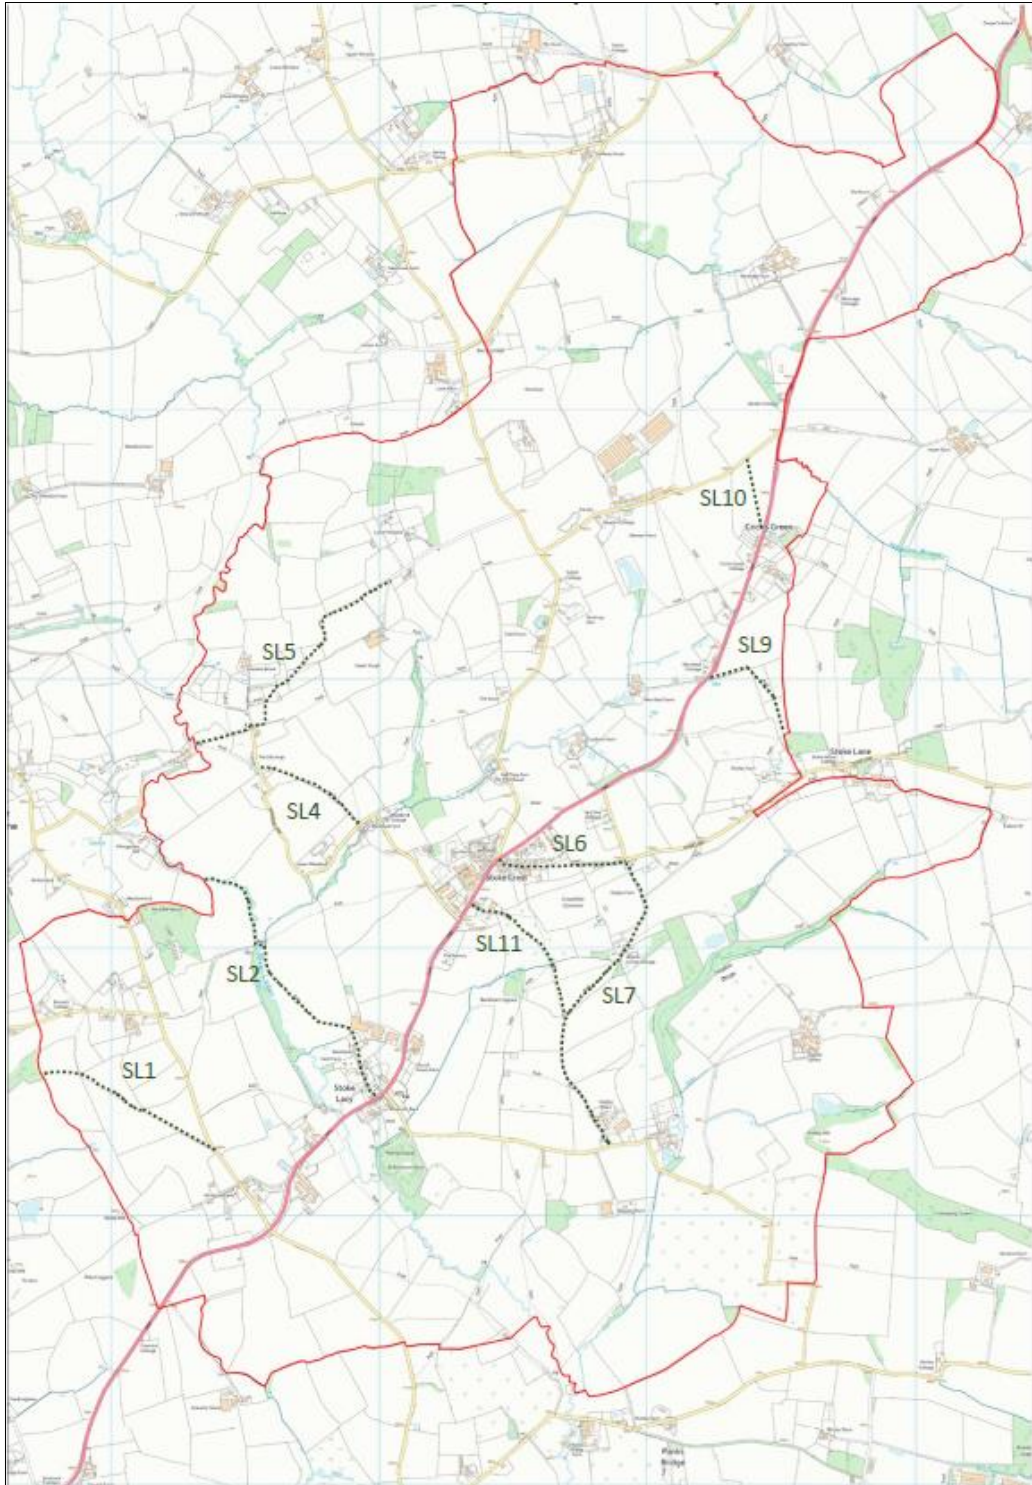

A 17th century timber framed barn with wattle panels. Some panels are open. Partly weather-boarded. Tile roof with gable ends. This barn is in the Stoke Lacy conservation area and is one of several there which have been converted to a dwelling.

o. Brick House (1276011) – 1 listing

Brick House is an 18th century red brick house. Two storeys. Three windows, sashes without glazing bars, ground floor right French window. Central door with moulded case. Band on first floor level. Brick dentil eaves. Modern tile roof with cope gable ends. Modern porch.

Appendix 6 Extracts from Herefordshire Housing Market Area Needs Assessment Final Report, July 2021¹⁸

14 BROMYARD HOUSING MARKET

Local Housing Need

14.28 Linking to the local housing need at a Herefordshire level of 846 homes per annum, our approach is that if a location has seen 10% of the growth, then it is projected that the sub-area will see around 10% of population growth moving forward. In addition, adjustments are made at a local level to take account of the communal population and also household structures by age. This is explained in greater detail from paragraphs 5.22 to 5.24.

14.29 The outputs for Bromyard are set out in the Table below.

Table 14.7 Estimated Household Change as a Proportion of Overall Need, Bromyard

	Housing Need	% of Need
Bromyard: Urban	24	2.8%
Bromyard: Rural	22	2.6%
Bromyard Total	47	5.5%
Herefordshire Total	846	100.0%

¹⁸ <https://www.herefordshire.gov.uk/downloads/file/22548/herefordshire-housing-market-area-needs-assessment-july-2021>

Affordable Housing Need

- 14.30 Following the same methodology used to consider the future housing mix at a County level as set out in Section 6, we have considered the level of affordable housing need in each HMA. The Tables below show the estimated need for affordable housing in the HMA – the first table looks at needs for social/affordable rented housing and the second considers needs for affordable home ownership (“AHO”) products.
- 14.31 Overall, the analysis suggests a need for 22 units of rented affordable housing per annum moving forward, with a particularly high need being seen in rural locations.

Table 14.8 Estimated Need for Social/Affordable Rented Housing (p.a.)

	Current need	Newly forming households	Existing households falling into need	Total Gross Need	Relet Supply	Net Need
Bromyard urban	1	9	6	17	13	4
Bromyard rural	4	17	4	25	8	18
HMA	5	27	10	42	20	22

Source: Range of Sources as Discussed

- 14.32 The analysis also identifies a potential need for AHO – albeit the need for this type of housing is somewhat lower than the need for rented accommodation.

Table 14.9 Estimated Need for Affordable Home Ownership (p.a.)

	Total Gross Need	Resale Supply (50% of LQ)	LCHO Supply	Total Supply	Net Need
Bromyard urban	9	8	0	8	2
Bromyard rural	17	10	0	11	6
HMA	26	18	1	18	8

Source: Range of Sources as Discussed

Older Persons Housing Need

- 14.33 Icen and JGC has also sought to consider the need for specialist accommodation at an HMA level following broadly the same approach to County-wide needs but with the current need being determined on a pro-rata basis linked to the local household population.
- 14.34 The HMA method is also slightly different in that it does not use data on local supply. However, by only looking at a current need based on the household population we are to some extent taking account of where supply is.
- 14.35 In order to establish the need for specialist housing, we have used the current (i.e., 2020) non-institutional population aged 75 and over to estimate current needs. Looking forward, we have considered the population change of people 75 and over the period to 2020-41 for future needs. The need for specialist accommodation – broken down by type and type - is shown in the Table below.

Table 14.10 Specialist Housing Need using adjusted SHOP@ Assumptions, 2020-41

		Current Shortfall/Surplus	Additional Demand to 2041	Net Need to 2041
Age-Exclusive	Market	3	5	8
	Affordable	-22	26	3
Total Age-Exclusive		-19	31	12
Housing with support	Market	75	67	143
	Affordable	41	50	92
Total Housing with Support		117	118	234
Housing with care	Market	12	40	53
	Affordable	10	30	39
Total Housing with Care		22	70	92
Residential care bedspaces		37	15	52
Nursing care bedspaces		4	42	46
Total bedspaces		41	57	98

Source: Derived from Demographic Projections and Housing LIN/EAC

- 14.36 The provision of a choice of attractive housing options to older households is a component of achieving good housing mix. The availability of such housing options for the growing older population may enable some older households to downsize from homes which no longer meet their housing needs or are expensive to run. The availability of housing options which are accessible to older people will also provide the opportunity for older households to 'rightsize' which can help improve their quality of life.
- 14.37 The Table above should be considered as providing a set of parameters for housing need in the HMA. The ultimate level of provision the Council seeks to support in Bromyard HMA will be influenced by its broader strategy for older persons housing and care at a County-wide level as well as at a local level.

Housing Mix

- 14.38 It is recognised that within Herefordshire and within each HMA there are spatial differences and therefore a different mix of housing may be more appropriate. Following the same methodology used to consider the future housing mix at a County level as set out in Section 8, we have worked through the key analysis to arrive a recommended housing mix for Bromyard HMA.
- 14.39 A series of outputs have been derived to consider the likely size requirement of housing within each of the three broad tenures for the whole HMA as well as the urban and rural area. A key part of this is occupancy patterns and detailed tables are provided at Appendix A2 which consider both local and regional occupancy patterns for the HMA.
- 14.40 The data linking to local occupancy will to some extent reflect the role and function of the local area, whilst the regional data will help to establish any particular gaps (or relative surpluses) of different sizes/tenures of homes when considered in a wider context. These have been brought together to provide a recommended housing mix, defined as a range, in the Table below.

Table 14.11 Bromyard HMA Recommend Housing Mix by Tenure by Size

		1 Bedroom	2 Bedrooms	3 Bedrooms	4+Bedrooms
Urban	Market	5%	30%	50%	15%
	Affordable home ownership	25%	40%	30%	5%
	Affordable rented housing	45%	35%	15%	5%
Rural	Market	5%	25%	50%	20%
	Affordable home ownership	20%	35%	40%	5%
	Affordable rented housing	30%	30%	35%	5%
HMA	Market	5%	25%	50%	20%
	Affordable home ownership	20%	40%	35%	5%
	Affordable rented housing	35%	35%	25%	5%

Source: Housing Market Model and Modelled Outputs, Appendix A2

Appendix 7 Stoke Lacy Design Guidance and Codes, November 2021

Please refer also to the full document on the NDP website.

Design Code 01 Pattern and layout of buildings

Area-wide Design Principles

- a. New development should reflect the original development spatial arrangement character by adopting similar development layouts;
- b. New development density and development size should be character-led and accord with the original low density - small scale developments settlement attributes;
- c. New development should provide property sizes that meet the local need and affordable housing in-line with the Herefordshire Council (Iceni study) evidence base on housing type;
- d. New development should be designed to be permeable, providing vehicular and non-vehicular connections to the existing settlement.
- e. The preference is for new development streets to connect through to other streets to enhance connectivity. The use of cul-de-sacs should be resisted;
- f. New developments layouts should integrate opportunities for contextual views, habitat corridors, and active travel access connections;
- g. New development layouts should respond to site specific micro-climates to increase the environmental comfort for building users, both internally and externally; and
- h. Passive surveillance for enhanced security should be considered and designed-in to the development; particularly relating to streets, pedestrian/bicycle access, play and parking areas

Character Area Specific Design Codes

CA1 - Stoke Lacy Conservation Area and Village

- i. The quantity of roadside facing development should be restricted to ones or twos; and
- j. Communal access and development that extends further than one plot back is characteristic.

CA2 - Stoke Cross

- k. Development dwelling quantities should be restricted to six and less;
- l. Centrally located new development could support sensitive mixed-use applications; and
- m. New developments should have not more than two dwellings facing the A465 with a primary elevation.

CA3 - Outer Neighbourhood Plan Area

- n. Small-scale farm redevelopments derived from original farm building layouts would be characteristic; and
- o. High-quality, sensitively sited new houses on single plots could be suitable.

Design Code 02 Green infrastructure, active travel and open space

Area-wide Design Principles

- a. Mature trees and hedges contribute to the character of the Neighbourhood Plan Area. These should be retained in any new development;
- b. Development new planting should be appropriate for the microclimate, soil type and provide opportunities for climate resilience;
- c. Orchard and hop planting is characteristic and culturally significant for the area and opportunities to incorporate this into development should be explored;
- d. New development green infrastructure should provide interconnectivity between existing green infrastructure networks and use the most appropriate species to maximise enhancements;
- e. Nature based solutions should be integrated and used to deliver new development;
- f. SuDS solutions should be designed into new development;
- g. Passive security should be a consideration on all active travel and open space concepts;
- h. Active travel infrastructure should be located close to bus stops to encourage sustainable travel options;
- i. Opportunities to connect-up existing main settlements through active travel options should be a development design driver;
- j. New development should incorporate features to enhance biodiversity including bat bricks, bird boxes and hedgehog gravel boards; and
- k. New multi-house developments should provide improved public access in areas where needed as part of the project delivery.

Character Area Specific Design Principles

CA1 - Stoke Lacy Conservation Area and Village

- l. Opportunities brought forward by development to enhance pavement connectivity should be explored; and
- m. Opportunities to provide better connectivity to PRow networks via development should explored.

CA2 - Stoke Cross

- n. Areas of Stoke Cross appear to be more visible from the outer Neighbourhood Plan area, therefore sufficient planting should be incorporated to visually mitigate new development;
- o. Opportunities to connect-up existing PRow infrastructure and improve the settlement offering should be explored; and
- p. The provision of publicly accessible green space would be appropriate here.

CA3 - Outer Neighbourhood Plan Area

- q. The aims should be to reduce habitat loss, increase tree cover and interconnect green infrastructure networks.

Design Code 03 Views and landmarks

Area-wide Design Principles

- a. Existing views of landscape or heritage significance should be maintained and used as a good placemaking opportunity within new development;
- b. Settlement edges should transition gradually through using mitigation planting, development layouts and materiality used to break-up development massing;
- c. Robust new development visibility analysis should be conducted to understand the extent of visibility within the NP Area to inform appropriate mitigation;
- d. Demonstrable design awareness should aim to integrate the development within its surroundings, and appropriate mitigation included such as trees and landscaping;
- e. Resident privacy should be designed into new development and care should be taken to maintain the privacy of existing developments; and
- f. Passive views can provide natural surveillance and security for development. Designers should use this concept, particularly towards streets, pedestrian access, open space, play and parking areas.

Character Area Specific Design Principles

CA1 - Stoke Lacy Conservation Area and Village

- g. Views towards the church should be incorporated into development where possible; and
- h. The setting of the Conservation Area and church should be respected by new development.

CA2 - Stoke Cross

- i. New development should avoid interrupting views from the wider NP Area.

CA3 - Outer Neighbourhood Plan Area

- j. The massing of all new developments should be visually broken up.

Design Code 04 Architecture and details

Area-wide Design Principles

- a. Traditional two story pitched roofed houses should continue to be the predominant typology within the NP Area;
- b. Bungalow typologies should be incorporated into new developments to provide varied house stock and accord with the height variation seen within farm developments;
- c. There should be some inclusion of perpendicular sited buildings, to mark boundaries, create enclosure and accord with settlement character;
- d. Pitched porches, dormers and chimneys are characteristic of the NP Area;
- e. Chimney position and height should consider neighbouring property window locations and prevailing winds;
- f. Decorative bonds such as Flemish Bond should be used to accord with settlement character;
- g. Contrasting lintels and string courses are commonly seen throughout the NP Area;
- h. Generous eave and verge overhangs should be incorporated;
- i. Traditional, natural or sustainably sourced innovative materials are most appropriate for soffits or verge cappings;
- j. Innovation, where appropriate to context, which explores the integration of green/brown roofs or standing seam roofs should also be encouraged; and
- k. Flat roofs for buildings, extensions, garages and dormer windows should be avoided. However flat roofs with ecological green/brown roofs may be acceptable.

Character Area Specific Design Principles

CA1 - Stoke Lacy Conservation Area and Village

- l. In accordance with settlement character, there should be strong architectural variation with each dwelling distinct from one another;
- m. High-quality innovation should not be stifled and used to compliment traditional architecture, the Conservation Area and wider character area; and
- n. Single plot infill or small-scale farm style developments should be used to vary building typology.

CA2 - Stoke Cross

- o. Greater architectural variation should be demonstrated across development; and
- p. Pitched roofs of 45° or greater should be encouraged.

CA3 - Outer Neighbourhood Plan Area

- q. New development in remote areas of the NP Area must take great care to accord architecturally with nearby precedent

Design Code 05 Materials

Area-wide Design Principles

- a. Exposed building elevations subject to prevailing winds and rain, materials should be considered carefully and appropriate façade treatments specified;
- b. Materials should be specified that are sustainable and ensure longevity. The preference for locally sourced materials should be encouraged;
- c. Brick is a common and practical construction material in the NP Area, due to the Herefordshire brick making industry and this use should continue for new developments;
- d. Careful attention should be paid to matching the tonal attributes and variation across facades in the NP Area;
- e. Timber frame construction is common and with many local sawmills, specifiers should consider timber frame construction sourced from local suppliers;
- f. Stone construction is seen across the NP area, ranging from limestone (church boundary) to rock-faced red-grey sandstone (church), red sandstone (Stoke Lacy boundaries walls) to rubble (various farm barns/wall). Stone should continue to be specified aligned with local geological character;
- g. Slate or terracotta tiles accord with local character;
- h. Standing-seam roofs derived from the agricultural aesthetic of the NP Area would offer an innovative alternative to slate or terracotta and would timber shingles roofs;
- i. Low quality concrete tile specification, which does not reflect NP Area character should be avoided;
- j. In appropriate rural situations, or as an ancillary roof - ecological green/brown roofs should be explored; and
- k. Contextually appropriate boundaries, including brick or stone walls and the use of native hedges should be used.

Character Area Specific Design Principles

CA1 - Stoke Lacy Conservation Area and Village

- l. Materials should be specified that are sympathetic to the Conservation Area and setting.

CA2 - Stoke Cross & CA3 - Outer Neighbourhood Plan Area

- m. New development should aim to specify unifying materials (local) to increase synergy with nearby developments; and
- n. Locally characteristic brick, stone or hedge boundaries should be specified, timber panel or feather edge fencing should be avoided on primary elevations.

Design Code 06 Building modifications, extension, conversion and plot infill

Area-wide Design Principles

- a. Modifications or extensions to brick-built properties should use suitable bricks of similar appearance and size. Modern metric system bricks (215 x 102.5 x 65mm) should not be used with imperial masonry structures – for consistency it is best to always source a similar brick. Buildings built before 1965 are likely constructed with imperial size bricks;
- b. Extensions should always be subordinate to the existing building and should not exceed the footprint of the original building envelope. The original building should remain the dominant element of the property regardless of the number of extensions;
- c. Extensions should not cause unacceptable detriment to the privacy of neighbouring dwellings;
- d. The architectural style of an extension should accord with the host building, using the same or innovative complimentary design language, character and fenestration rhythm;
- e. Modifications to existing buildings should preserve and enhance the existing building's architectural style;
- f. Developments which aim to renovate, upgrade and enhance derelict or degrading properties should be encouraged as re-use is more sustainable;
- g. Modern design with contrasting high-quality materials is often the best approach for extensions to listed or heritage buildings of significance, with clear definition between old and new. For more information see: <https://www.spab.org.uk/advice/alterations-and-extensions-listed-buildings>
- h. External working from home office spaces should be well designed, provide enough natural light, be thermally efficient and secure;
- i. Infill plot development should respect the scale, massing and architectural details of the character area within which it sits; and
- j. Renewable technology additions should be well integrated to protect the existing character of the building. PV, solar thermal or other building mounted services should be located discretely. For heritage or listed buildings, installation should respect key elevations of the historic asset.

Character Area Specific Design Principles

CA1 - Stoke Lacy Conservation Area and Village & CA3 - Outer Neighbourhood Plan Area

- a. The character of old farms and farm buildings should not be simplified and lost through redevelopment.

CA2 - Stoke Cross

- b. Extensions or building modification should be viewed as an opportunity to enhance the overall architectural character of the property and create enhanced synergy with NP Area character

Design Code 07 Waste, recycling and utilities

Area-wide Design Principles

- a. Appropriate areas for waste and recycling should be considered and integrated within the development design;
- b. Renewable technologies should be explored and integrated where site conditions provide sustainable advantages. Care should be taken to design-in these technologies and ensure cables and ducting etc are well integrated;
- c. Simple rainwater harvesting facilities such as water butts should be integrated within scheme design to reduce water consumption;
- d. Maintenance and meter reading should be considered, and utilities located discreetly with good access;
- e. Sensitive lighting design should accord with the light strategy of the NP Area. Development lighting design should consider ambient lighting levels and identify sensitive receptors to artificial lighting. Incorrect lighting specification can impact neighbouring properties and be harmful to wildlife; and
- f. Electric vehicle charging, mobility vehicle charging, and secure storage should be considered and integrated where needed.

Design Code 08 Sustainability and building performance

Sustainability starts by design: beginning with contextual analysis, identifying opportunities and constraints and using this to inform the layout and construction type.

Though combining materials and diligent construction detailing, problems such as thermal bridging should be designed-out and materials which are more sustainable and give better energy performance and should be specified.

Older buildings can also achieve increased energy performance, through the retrofitting of insulation, or replacing windows with models that have improved R-values.

Retrofitted cavity blown insulation should be avoided as it stops the effectiveness of a cavity to drain and can lead to damp and interstitial condensation issues.

Developers should be encouraged to go above and beyond current building regulations to future proof development For more information on sustainability and building performance : Building for Life 12: <https://www.designcouncil.org.uk/resources/guide/building-life-12-third-edition>

BREEAM: <https://www.breeam.com>
